# Ultimate Affiliate Swipe File Collection

Congratulations on grabbing your Ultimate Affiliate Swipe File Collection! This is a never released package of swipe files that will help you copy-and-paste your way to affiliate commissions.

The best part is...I have set this up so that you can grab a subject line, a couple call to actions, a P.S., a trigger, etc. and craft an awesome promotional email in no time. I have to admit I originally was going to put together complete emails for you to copy and paste.

But the problem with most swipe files is that they are only relevant to the product they were originally promoting.

So instead of giving you a small list of copy and paste emails you may or may not be able to use I put together a massive list of elements you can copy and paste together to create your own emails that pull in commissions. To top it off this will leave you plenty of room to inject your personality into your emails.

So lets get right into it...
