How To Use The Squeeze Pages

The Squeeze pages are almost ready to go out of the box, all you have to do is add your autoresponder code and upload it to your site first. ☺

If you're not sure how to edit your autoresponder code, watch this video and it'll show you exactly how.

http://graphicsoria.com/free/help-videos/video-5-how-to-integrate-aweber-to-squeeze-page-template/

To upload the squeeze page to your site, simply go to your cpanel, open your file manager, and upload the files there. This should give you a working web page with your squeeze page on it, ready to go. ☺

If you have any problems, feel free to contant me at Contact@imwithgabe.com and I'll help you out.

Enjoy!
