Local SEO Citation List

As mentioned in the main blueprint guide to starting your own agency, here is a list of 200+ citations to use for your clients. Remember, outsourcing can be your friend when it comes to some of this but if not, here you go, register your heart away. Some of these citations are pulled from my citation reports on Bright Local. It's an awesome piece of software that creates reports for you, but it isn't necessary for you to get moving. Once you hit a certain level, you may want to consider using it for your tracking and reports.
