Monster Profit Automator User Guide

Introduction

Hey there Naidy here!

Thank you for investing in the Monster Profit Automator!

I’m sure that this plugin will serve you well.

The Monster Profit Automator will allow you to automate your Reddit marketing efforts, giving you true hands-free, passive income.

If you have any questions at all, please do not hesitate to contact me at contact@abcmoneymaking.info

Before Using The Plugin

The Monster Profit Automator is incredibly easy to use.

But before you begin using it :

- Please go through the main guide at least twice, especially if this is your first attempt at Reddit marketing. This is because it's important to understand the mechanics of Reddit and how it relates to this plugin.

- Please go through the process manually for at least a week before using the plugin. There are several reasons for this :

- If you don't do it manually first, you won't understand how the whole process works and it's easy to make a mistake.

- If you're not getting results doing things manually, you won't certainly won't automating it. The key to a successful business is to tweak and optimize, *then* automating. Make sure you're getting results before using it. Refer to the main guide to find out how to improve your results.

- There are many restrictions on new accounts. This plugin will automate your marketing efforts by submitting posts on your behalf via your Reddit account. The Monster Profit Automator is a plugin, **not** a bot, it does not bypass the Reddit security mechanism.

How do you determine whether your account is ready for the Monster Profit Automator?

You know that your account is in good standing with Reddit and is ready for the plugin when you no longer have to enter a CAPTCHA when attempting to submit a post.

are you human? (sorry)

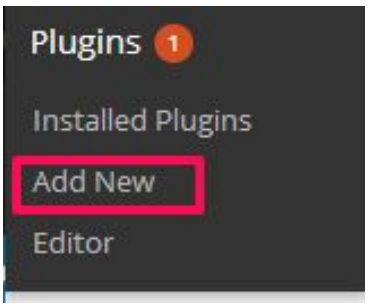

The quickest way to achieve this is to post every day for a week and make good use of the free karma section (again, please refer to the main guide)

Installing The Plugin

By this point you should already have a website up and running (once again, please go through the main guide to see why you should have one and refer to the "cash-sucking machine" report and learn how to create one.

1.) Go to your Wordpress dashboard.

Mouse over plugins, then click on "add new".

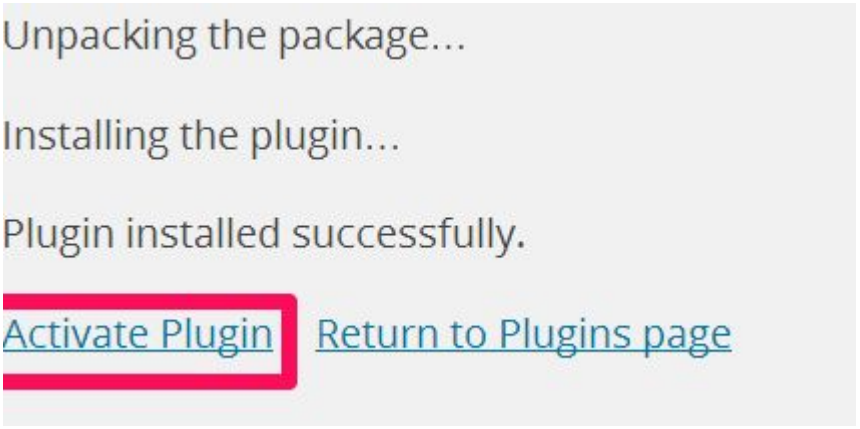

2.) Click "upload".

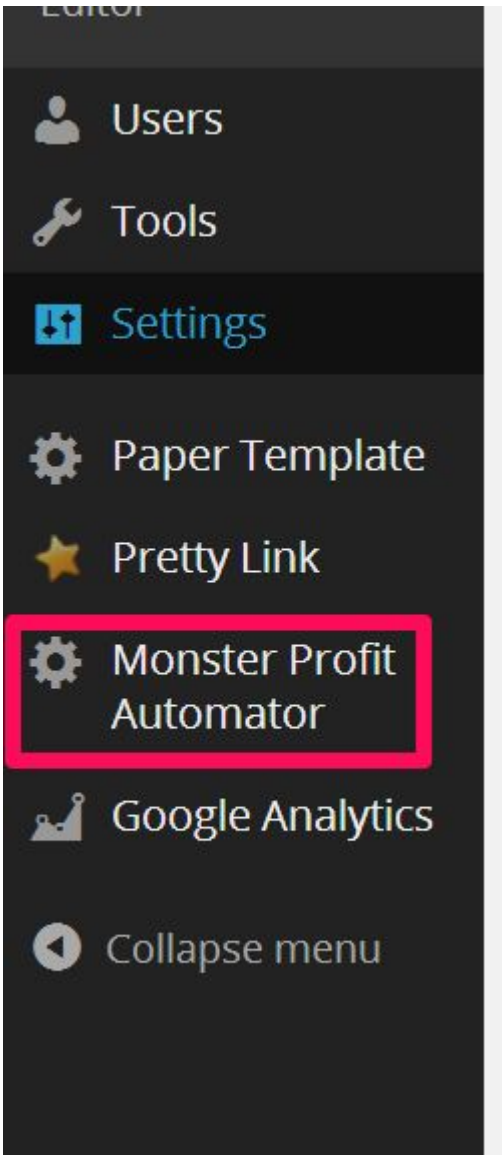

3.) Select the Monster Profit Automater in zip.format (do not extract it) , then click "install now".

4.) Activate the plugin.

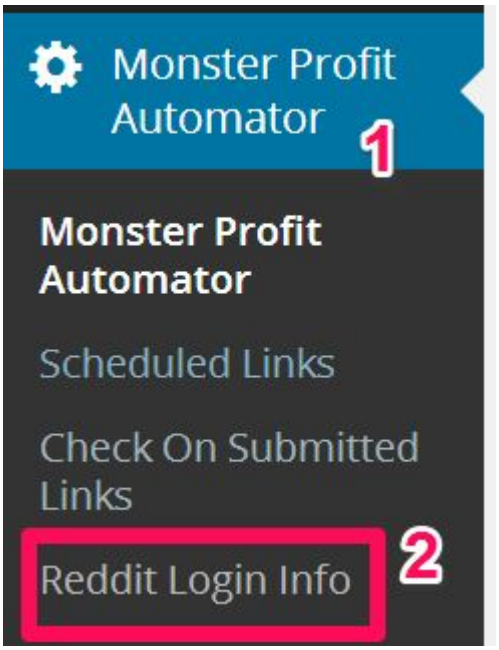

5.) Congratulations, you've successfully installed the Monster Profit Automator!

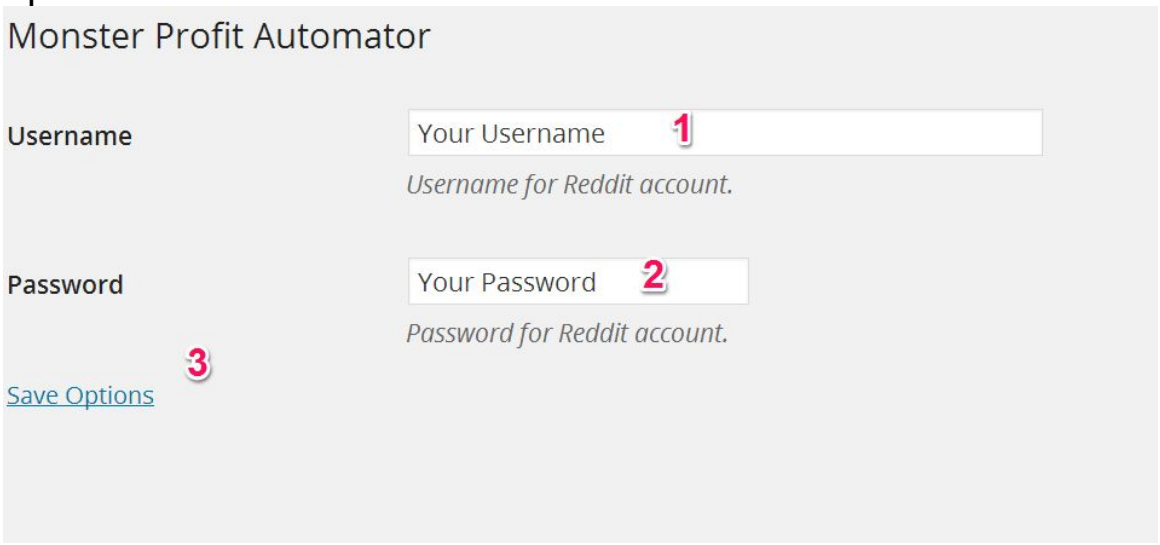

Logging Into Your Account

The first step to using the plugin is to log in to your Reddit account.

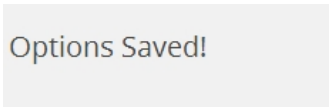

1.) Under "Monster Profit Automator", select " Reddit Login Info".

2.) Next, enter your username and password, and click "save options".

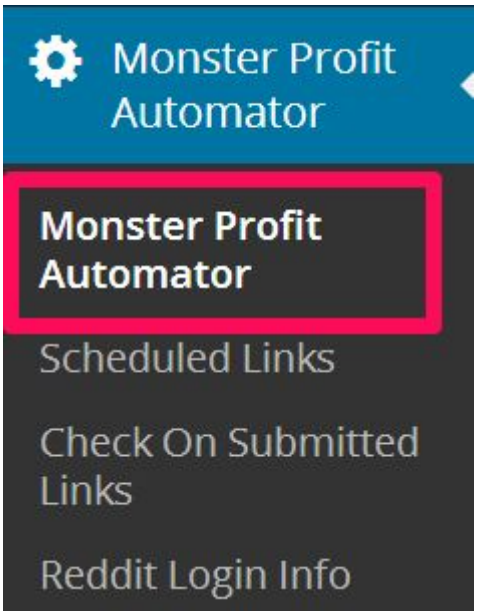

3.) You've saved your login info and the Monster Profit Automator will submit posts under the account!

Scheduling A Post

This is where the magic happens. To schedule a post, go to "monster profit automator".

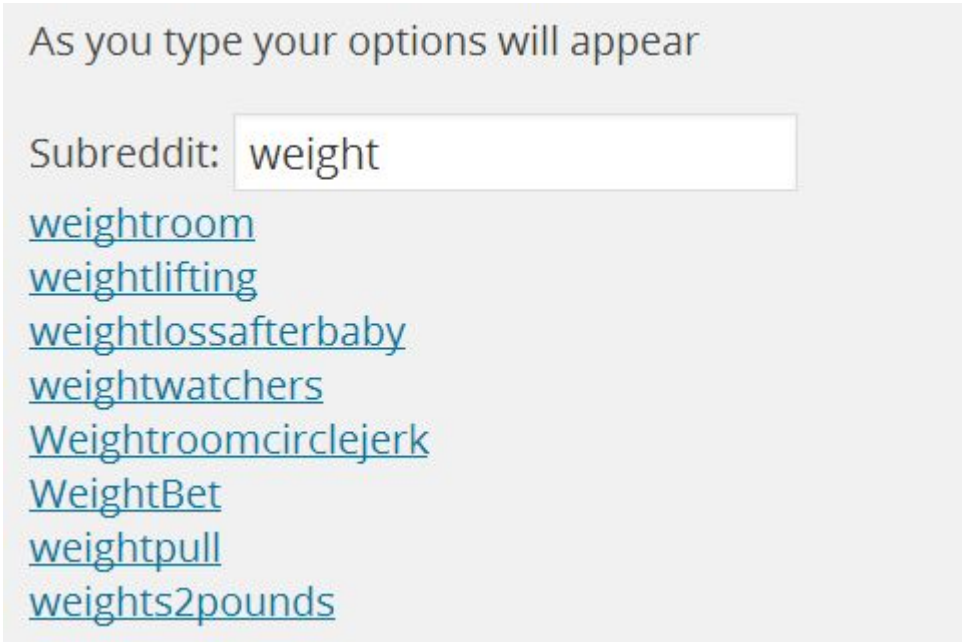

1.) The first step is to select a post from your website.

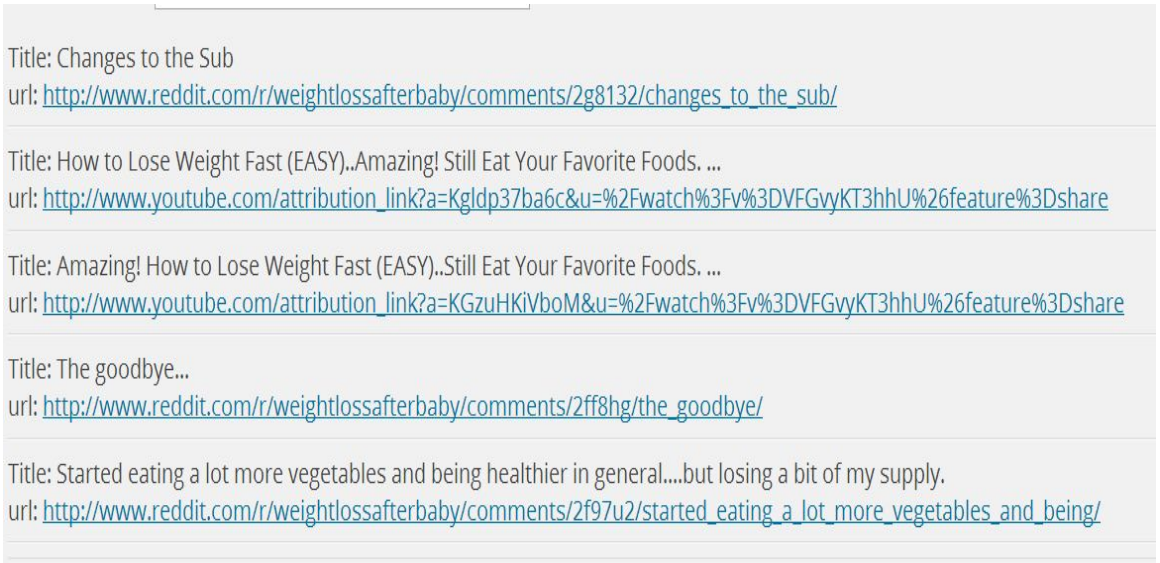

By this point you should already have a couple of posts on your website - this is why it's important to do things manually first!

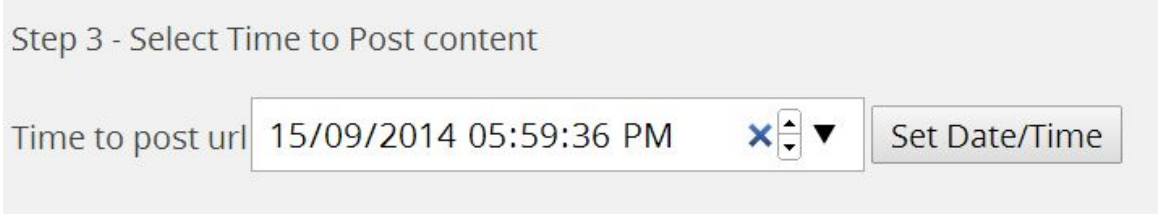

2.) Next, if you don't already know your intended subreddit (again, refer to main guide), type in your main keyword and you'll see a bunch of suggestions for subreddits.

3.) Select your intended subreddit and you'll see some examples of existing posts in the subreddit. This is to confirm that it's the right subreddit for your post.

4.) Next, set the time and date you want the post to be submitted at. The time displayed will be in your time zone for your convenience.

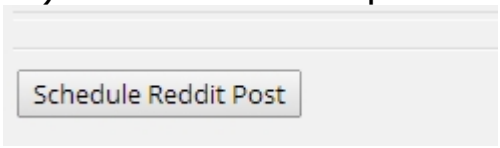

It'll be in UTC after you've submitted it.

5.) Double check the post, subreddit, and date at the top of the page

6.) Click "schedule post"

You've successfully scheduled a post!

***** Important *****

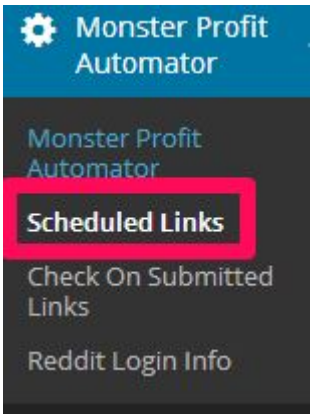

You'll only be able to schedule one post per day because most of the time, you're only allowed one post per day on Reddit.

If you do things correctly, like I show you in the main guide, you'll only need one post per day.

Canceling A Scheduled Post

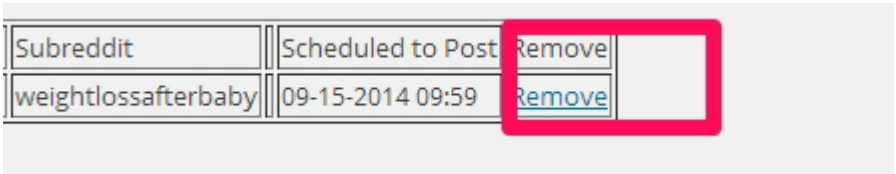

You may make a mistake in scheduling your Reddit post. No worries - there's an option to remove it.

Simply go to Monster Profit Automator > Scheduled Links

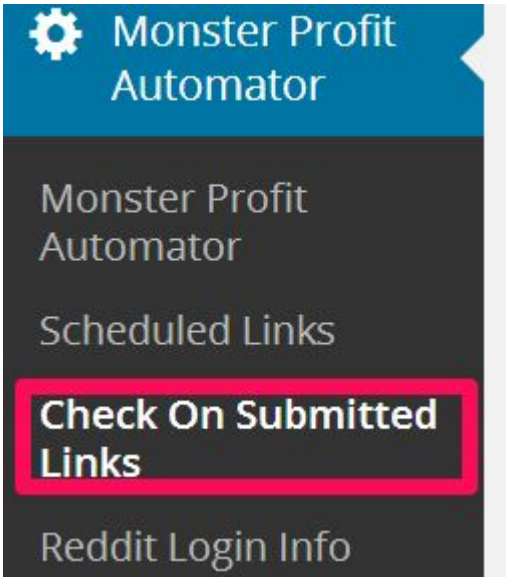

Then, click on "remove" to cancel your post.

Remember, this will only cancel posts that have not went out, if you want to delete posts that have already been submitted you'll have to do it via Reddit.

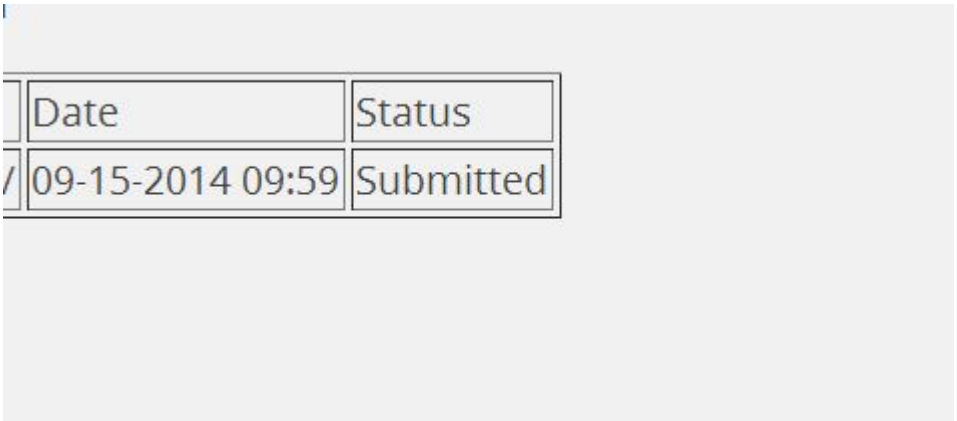

Checking On Scheduled Links

If you want to check on the status of a scheduled link, go to Monster Profit Automator > Check On Submitted Links.

If the link has been submitted, it will say "submitted", and if it's been scheduled and not yet submitted, it'll say "scheduled".

Congrats! All you have to do now is rinse and repeat to create hands-off, autopilot income!

Here are some frequently asked questions :

1.) I don't understand the terms that you've used in this manual!

I cannot stress how important it is to go through the main guide at least twice to learn the terminology and completely digest how Reddit works.

It's all in the main guide :)

2.) Can I install the plugin in multiple sites?

Yes, you can. You can install it in as many sites as you want.

3.) I can't schedule a post!

-Make sure you've saved your Login Info.
-Make sure you've chosen a page.
-Make sure you've set the time and date.
-Make sure you've chosen a sub-reddit.
-Make sure that you haven't scheduled that post before.

4.) The status says that my post has been submitted but it's not showing up in Reddit!

- Make sure to use your Reddit account manually until the CAPTCHA requirement no longer exists.
- Make sure to only schedule one post per day.

5.) How can I contact you?
