
FREE TRAFFIC
JACKPOTS
Khondoker

Introduction:

Welcome! And thank you for picking up "**Free Traffic Jackpots**!" report.
As you know, traffic is the most common word used in online business. You will need it in every minute if you are with the Internet marketing. It is considered as the lifeblood of any on-line scheme that you are on.

Before we jump into the "Traffic" issue, let me show you, how on-line businesses run. Every on-line business entrepreneur follows a particular principle or a specific process to run their business. If we dissect and analyze the process, we will find three issues. Among them, they already have implemented one, and they are continuously working on other two! So what's the issue they have completed and what are the other two they are doing continuously?

1) they have completed setting up a **proper funnel** (generally a series of transitional web pages) for their offers.

2) they are relentlessly working on sending traffic and more traffic to their funnel, and

3) they are continuously on the pursuit of building relationship with their visitors. Generally, they do it by maintaining a contact database but there are many other ways they follow for building and keeping relationships. These three things together make their businesses successful, and none of the three are less important.

Now, your “proper funnel” could be anything from your blog, your website or your squeeze pages, whatever that converts. Of course, you need traffic to your funnel to make that conversion.

One thing is for sure that you cannot make money without traffic, no matter how decent your funnel is or how excellent your offers/products in the funnel are. More traffic means more sales. No traffic to your funnel means no sales.. It's simple like that.

So, you need to implement every method that can bring you traffic to your funnel, that is, if you want to make money promoting your offers. And “Free Traffic Jackpots” is created to feed you a number of unused and underused, “thick & fast” traffic sources in the Internet. You can use these to generate

traffic and make money. There will be no shortage of traffic to your funnel if you could combine the methods I am about to reveal here. And the best part is all the methods are free to implement! You do not have to pay for this traffic you generate from Traffic Jackpots!

But before we dig deep into it, let me tell about myself a bit. My name is Khondoker and since it's difficult to pronounce for most of you (lol), you can just call me, “K”. That's what my Internet marketing associates, partners, fellow-mastermind-group-members and mentors call me!

I'm in the Internet Marketing for five years now- full time, with no day job right from the start. The first year was difficult, but I had my goal ahead and had the drive to reach the goal. I advanced taking one step at a time and eventually reached my primary goal, which was earning $100 a day.

Before reaching my primary goal through the Internet marketing, I was living on writing contents all day and night at oDesk. That was how I started my IM journey! But things changed within a year. I managed a couple of local companies selling international brands (like KFC, Pizza Hut) and appointed as

their fan page administrator. It was 15 minutes work per day per page, and they were paying me more than enough and more importantly leaving me sufficient time to concentrate on my Internet marketing business. I grabbed the opportunity with my both hands and rigorously utilized it.

I must mention here that, I consider myself lucky because the first thing I did (the day I started my IM journey) was to create a free account at the Warrior forum. Everything I know about IM (including traffic issues), I learned from there and still learning.

By the end of 2011, a number of my affiliate sites (Amazon & Click Bank) were making me a steady income, and I was happy with the income growth. But then, the Google Panda and Penguin updates ruined everything. At that time, I had to go through almost a year of down time; frustrated, desperately trying to figure out my direction. That situation forced me to realize that I cannot let others to control my traffic flow (which is the life blood of my business). I have to work on creating my own private traffic, my own private audience over whom I'll have the total control! So I focused all my attention to build my email list and focused on many other traffic methods that are not related to

any search engine. I started list building and email marketing at the end of 2013, and it has given me the success beyond my expectation!

I use to build my list using several traffic methods. None of them are dependent of search engines, and I am about to reveal the most successful among the methods I have implemented so far.

In the “Free Traffic Jackpots” report, I have laid the exact traffic methods I personally use. I won't keep you waiting any longer... let's jump into the meat and start making money.

Jackpot 01: IMDB Traffic

Let me start with a very unusual place to generate traffic. Most of you may know IMDB site at imdb.com . It's the top movie database site in the Internet and highly popular too. According to Quantcast, 15.3M people visit the site from USA alone per month. What if you could grab a portion of the traffic to your offer? Can it be done? Of course! I'll show you how it could be done.

Head over to IMDB site at imdb.com and make a free registration if you are not a member yet.

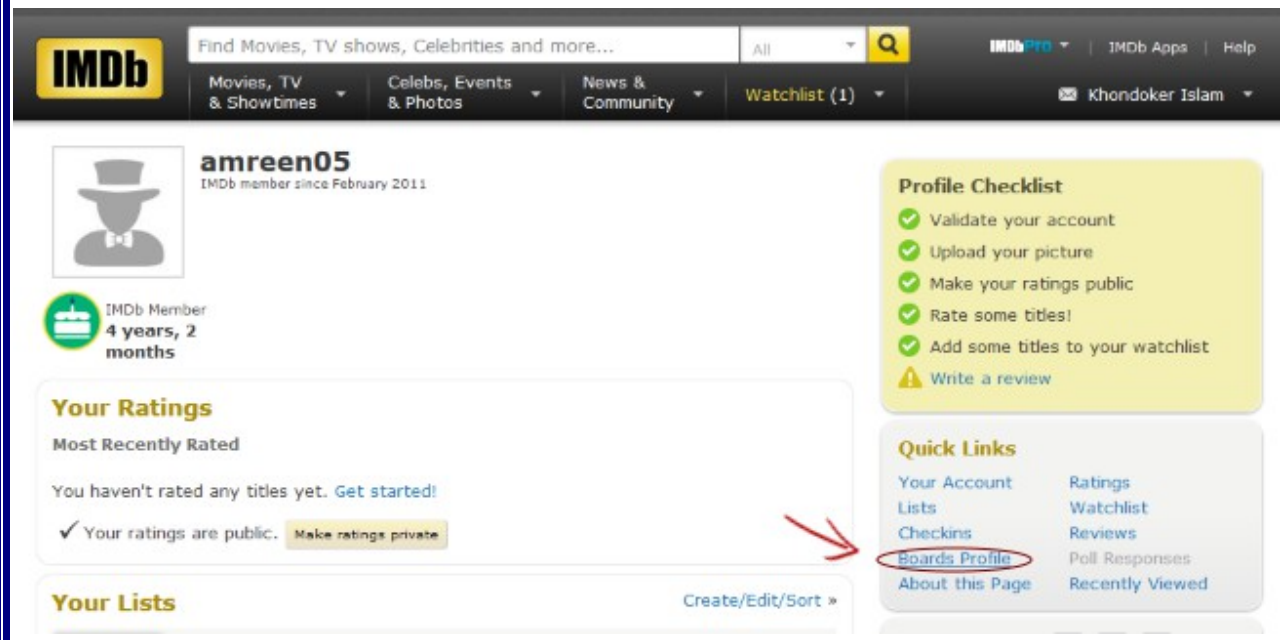

Login to the site after registration and you'll see your name in the right upper corner of the site. Click on the small arrow beside your name and click on “Your profile”.

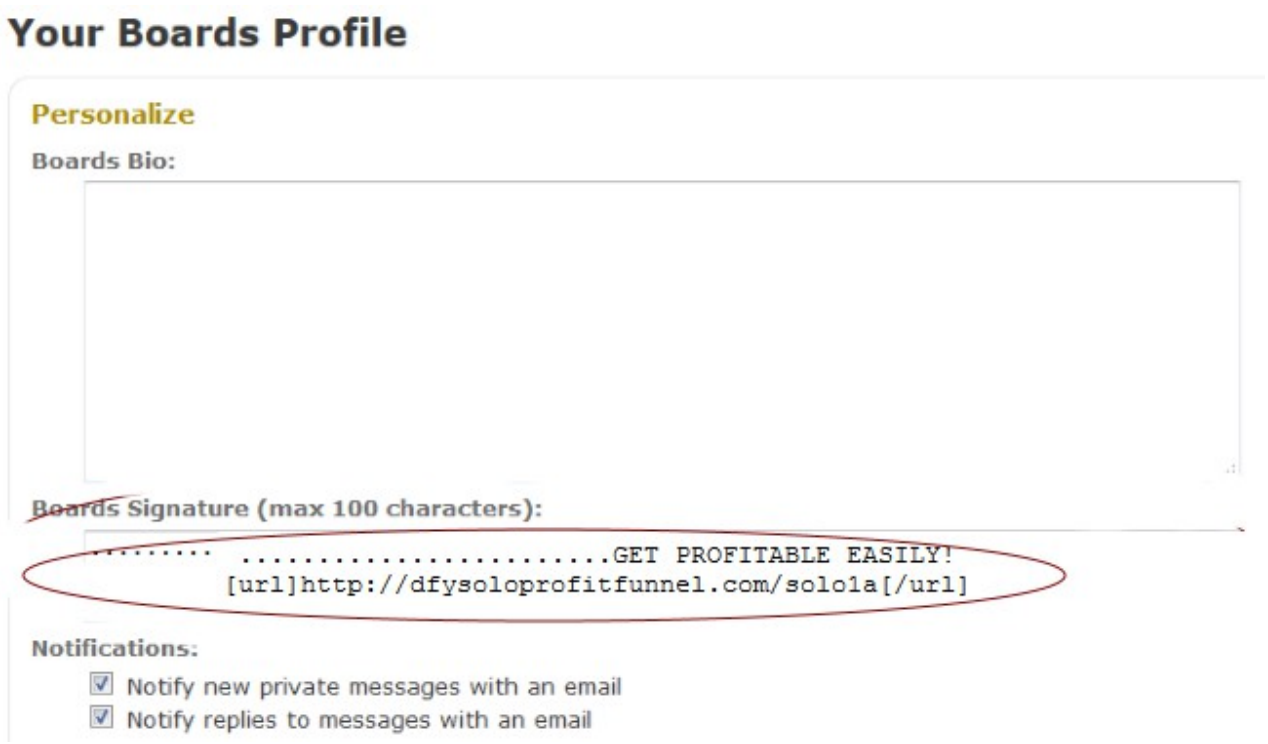

You want to fill out your profile information as much as possible. So that, other members could relate you as a person with your account. This builds trust, and it's true for any forum. You should make a quick check on the forum rules as well.

Now click on “Boards Profile” shown at the picture below:

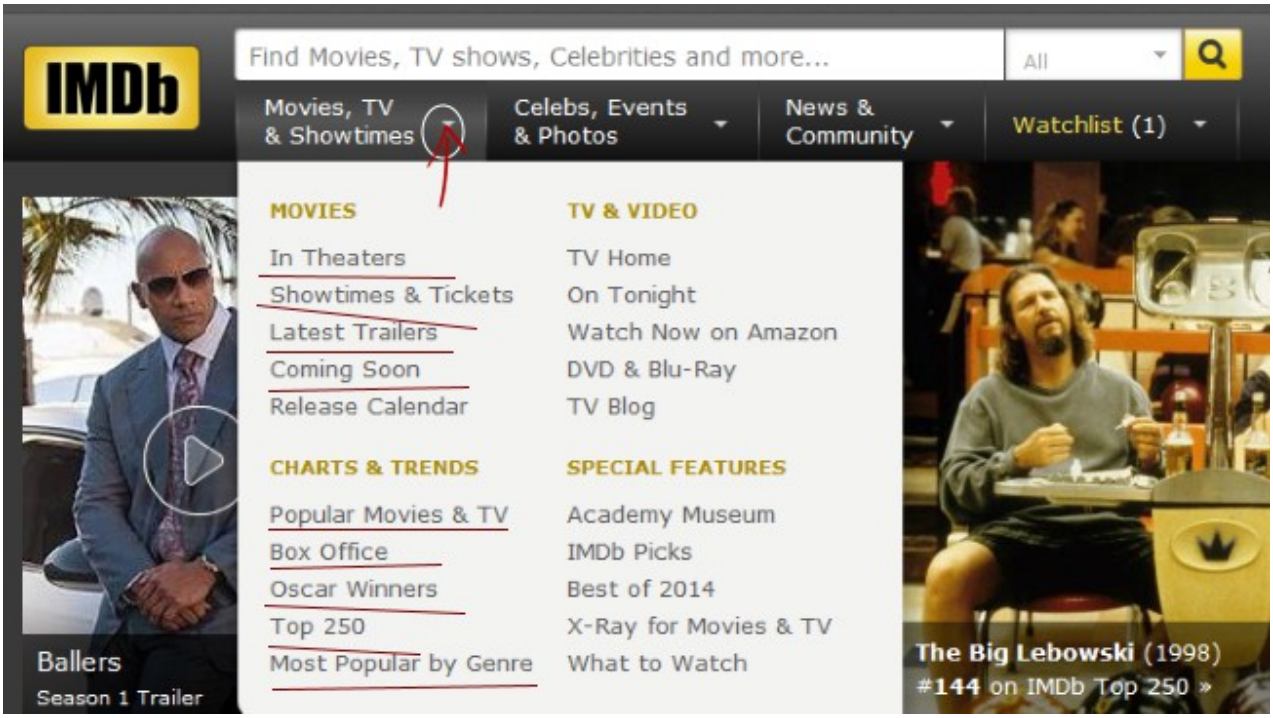

It'll take you in a page like below. Here is the place to insert your hyper linked signature. The forum accepts BB code only. So place your link with whatever you want to make appear with the link. See example pic. Below:

Now, understand this. You got a hyper linked (board) signature that leads to your offer. There are discussion boards for each movie, and members discuss various things with each other. You are going to participate in that discussion and add some value. You can ask questions and start a discussion thread. But I like to advise against that initially, you just take part in the discussions. Start a thread after some time when you get used to it. Whatever you discuss, your board signature will be attached to your discussion, and it will attract attention of other members if you play right. Find movies that you have watched. Get to the discussion board of that movie and read some threads. Follow how things are discussed there, and then start participating.

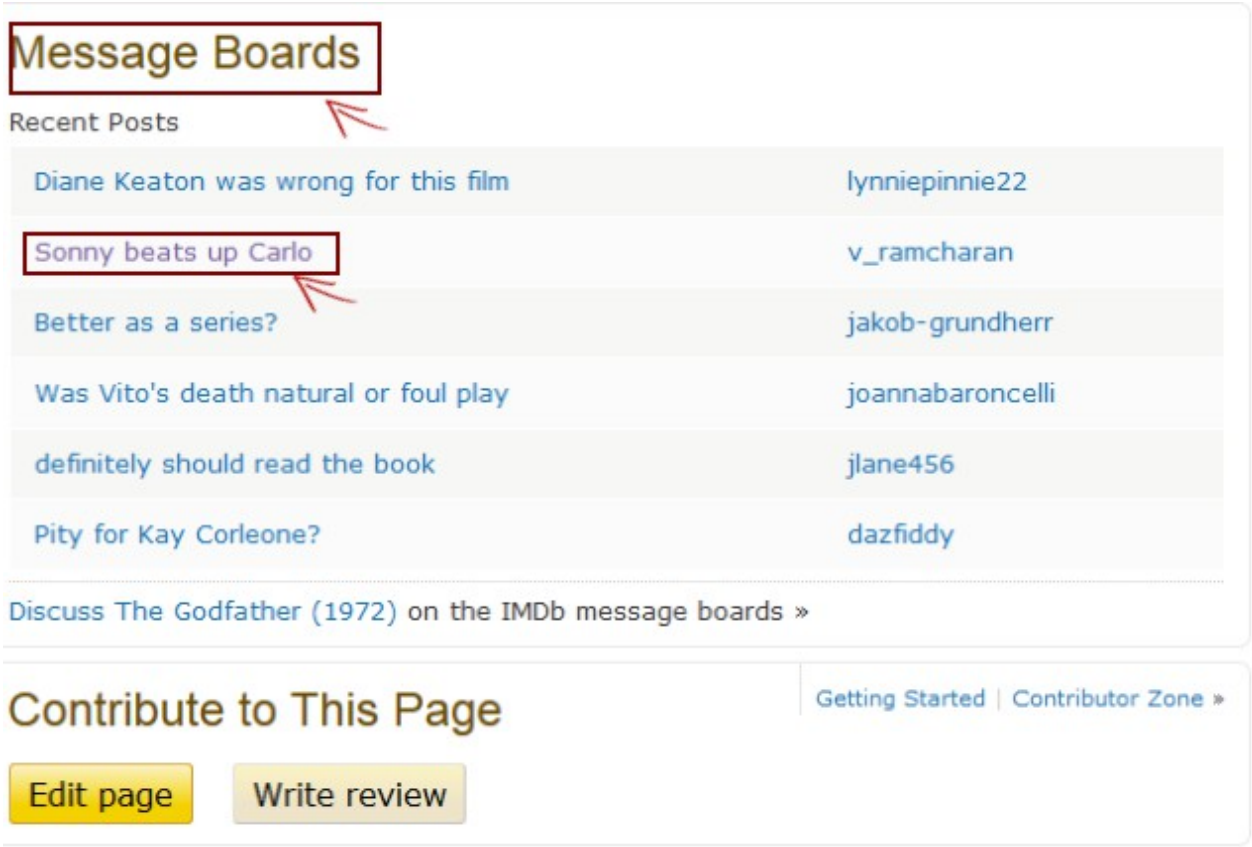

Now. Where to find the movies you watched? Go to the main page of the site. Here you can find all sorts of movies. You also can use the search box to find a particular movie if you want to.

Let me show you where your signature will appear. I choose my favorite movie, The God Father.

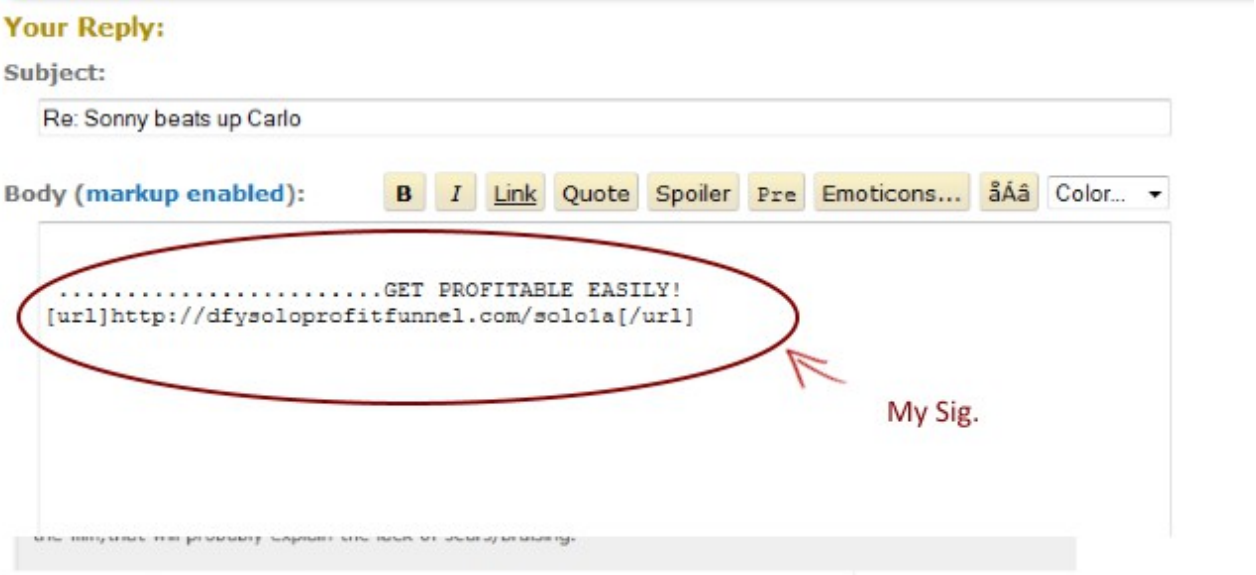

You'll see some discussion topics are there already. I clicked on a discussion, “Sonny beats up Carlo”.

Clicking on “Sony beats up Carlo” brought me to this page:

Here I clicked on reply and reached the page below:

You'll notice that your signature code was already there. You have to make your comment above your signature. After you are done click on save at the left bottom of the page. After I saved my discussion, it appeared like below picture with my signature hyper linked!

Pick your watched movies or TV serials and involve yourself in the discussion board, it's fun! Doing this 10- 15 minutes per day will bring you a surge of traffic! But finally, I must warn you, don't spam! Do it with passion and have

fun!

Be innovative selecting your offer for the traffic of IMDB. Think out what would go well for movie lovers. You can think out plenty of good offers if you research the traffic type! CPA offers convert better for me!

I enjoy movies and TV serials everyday. Once a day I participate in the discussion over a movie I watched and it is a fun to me! Everyday I'm getting over 100 visitors to my offer doing what I love to do. And I do it within 10 minutes!

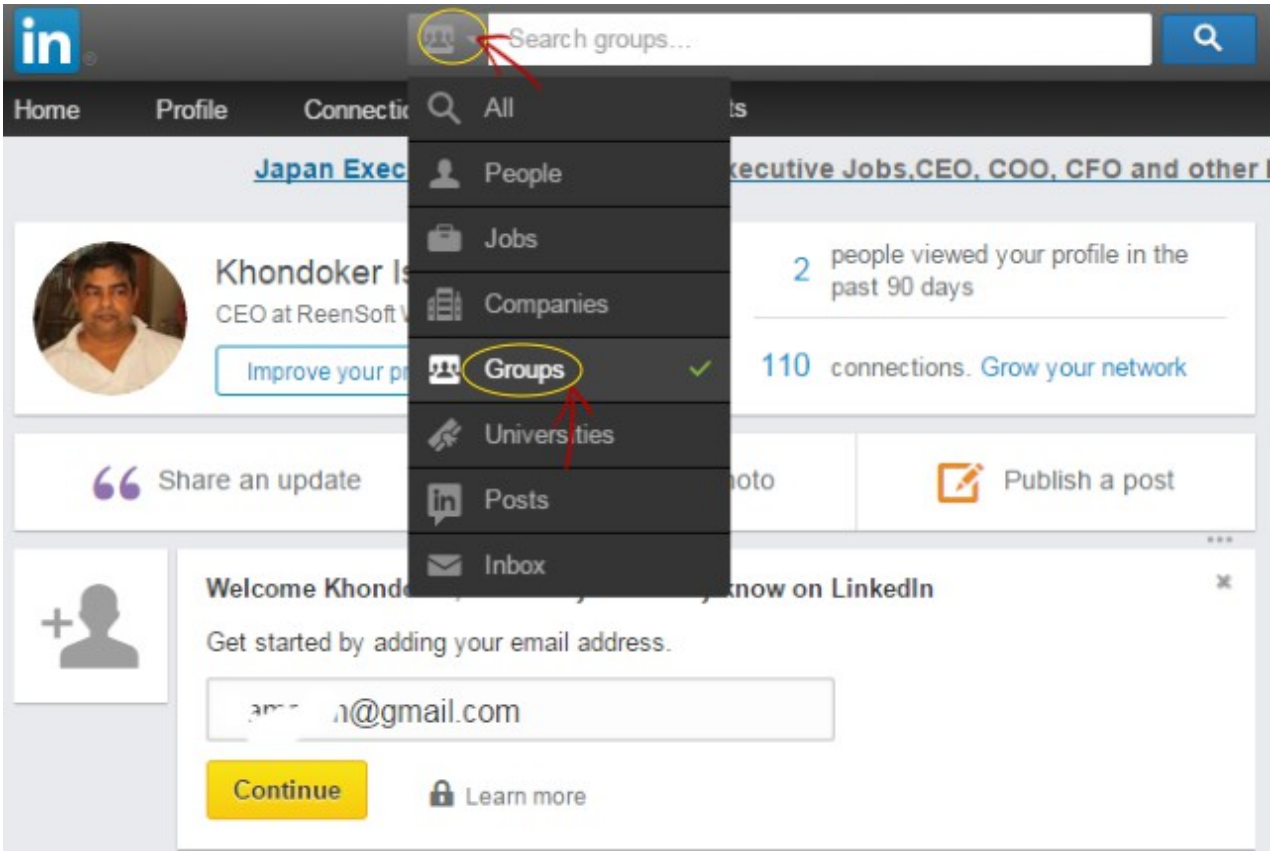

Jackpot 02: LinkedIn Traffic

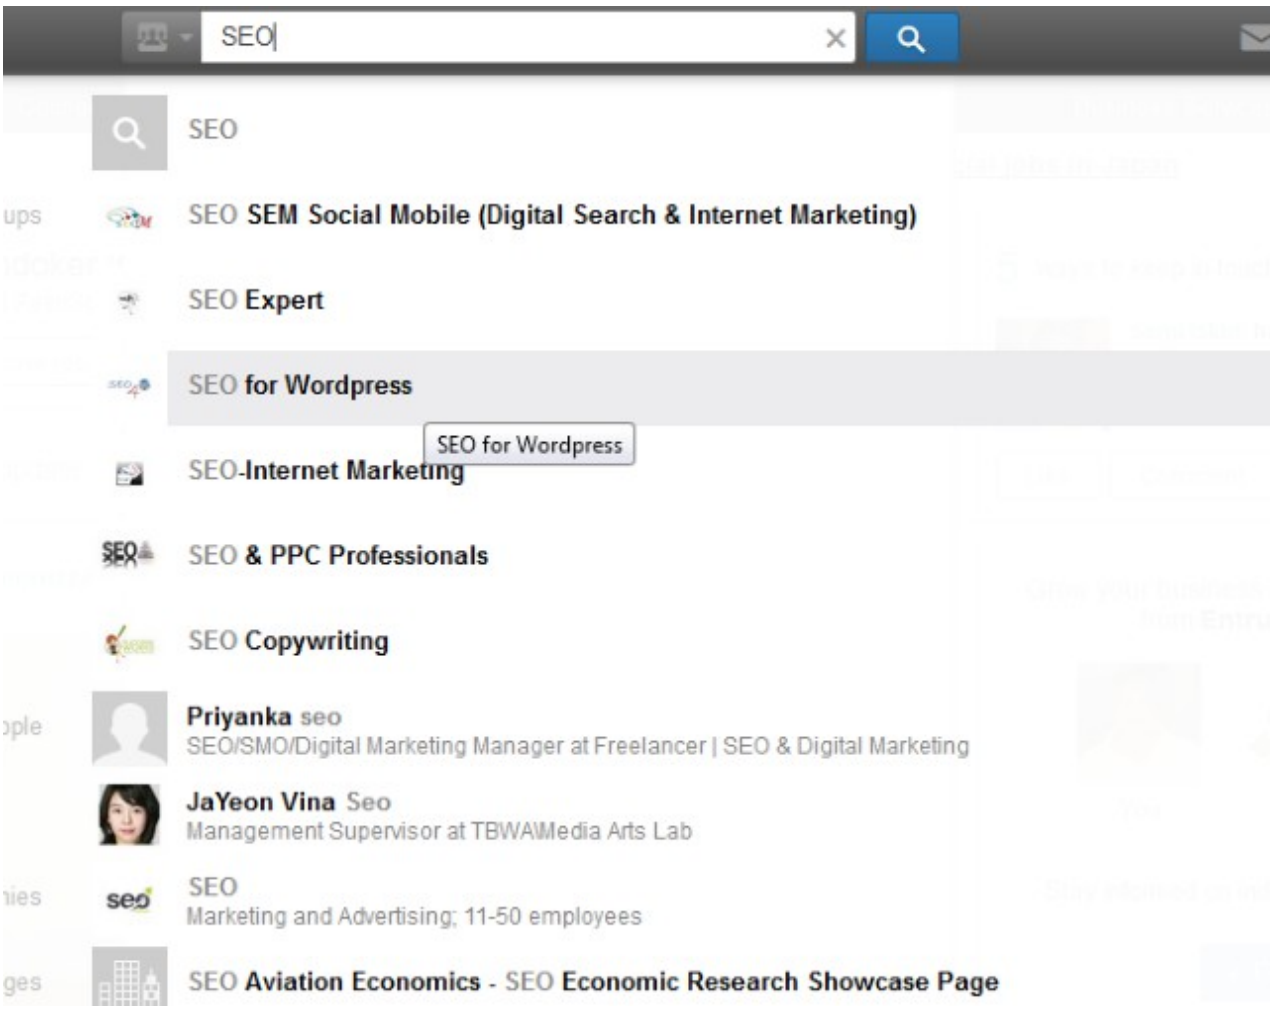

Traffic from LinkedIn site at www.linkedin.com is one of my favorite kinds of traffic. Only because I can generate my niche specific traffic from here. But before I show you how I do it, let's get what the site all about. LinkedIn is a marketplace for professionals. Employees and employers can engage with each other in various ways. The site is hugely popular and according to Quantcast, 39.6M people from USA alone visit the site per month!

To generate traffic from here to your offer, you'll need your own blog. The first thing you are going to do is to make a free registration to the site. Login after register, and fill as much profile information as possible and go through the rules.

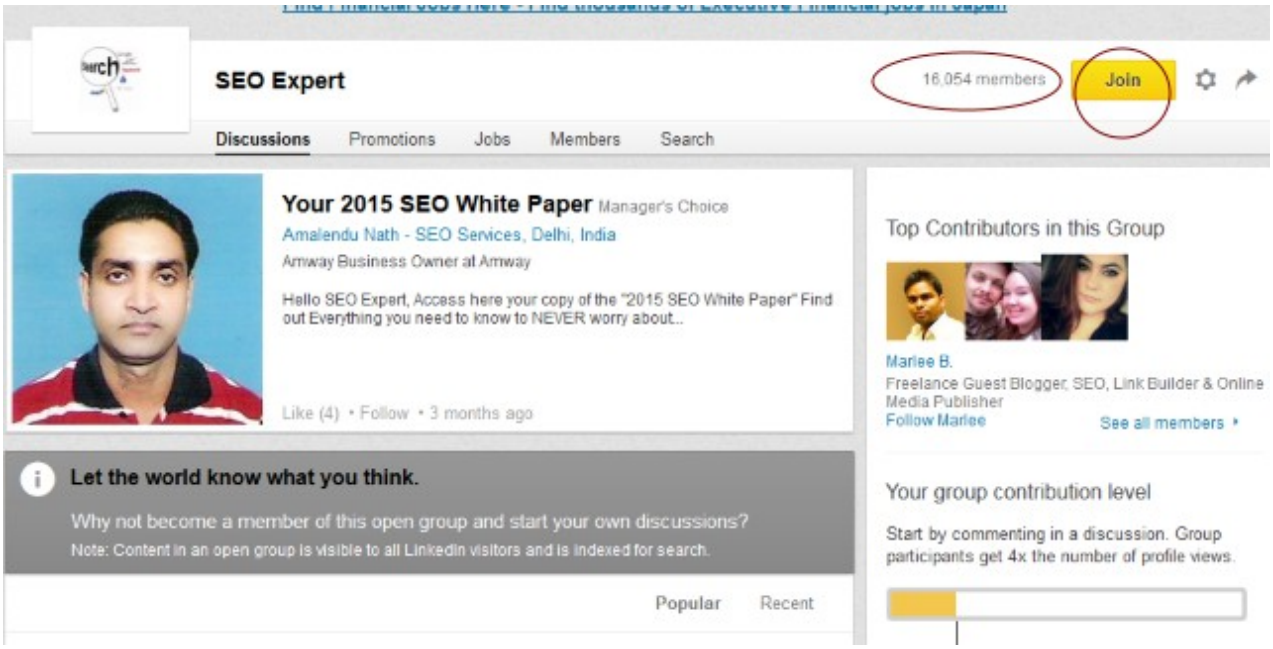

Come back to the main page after you have through with all the basics and click on the small arrow to the left of the search box at the top center of the page. Clicking on the arrow will open a drop-down menu. Select “Group” and click on it.

Now, type your keyword in the search box and You'll see many suggestions are appearing in the drop-down box as you type! Click the group you like. You have to choose such groups that have huge followers. I typed my keyword “SEO” and following suggestions appeared.

I selected a group called “SEO Expert” and forwarded to this page. Here I can see that this group has 16003 members. It is good for me so can I clicked on “Join” at the right top corner.

There are two types of the group, open groups and closed groups. You need to wait for admin's permission if you apply for closed groups. Generally, you can get it easily within 1 to 3 days. LinkedIn will allow you to join up to 50 groups of your choice. So you must select 50 groups in your niche. Groups with a higher number of members will be better for our purpose. But do not try to join all the 50 groups in one day. Join 10 to 12 in one day until it becomes 50.

Now, you have to post an article to your blog. Write and post a unique article that your niche would love to read. Copy the url of your blog post.

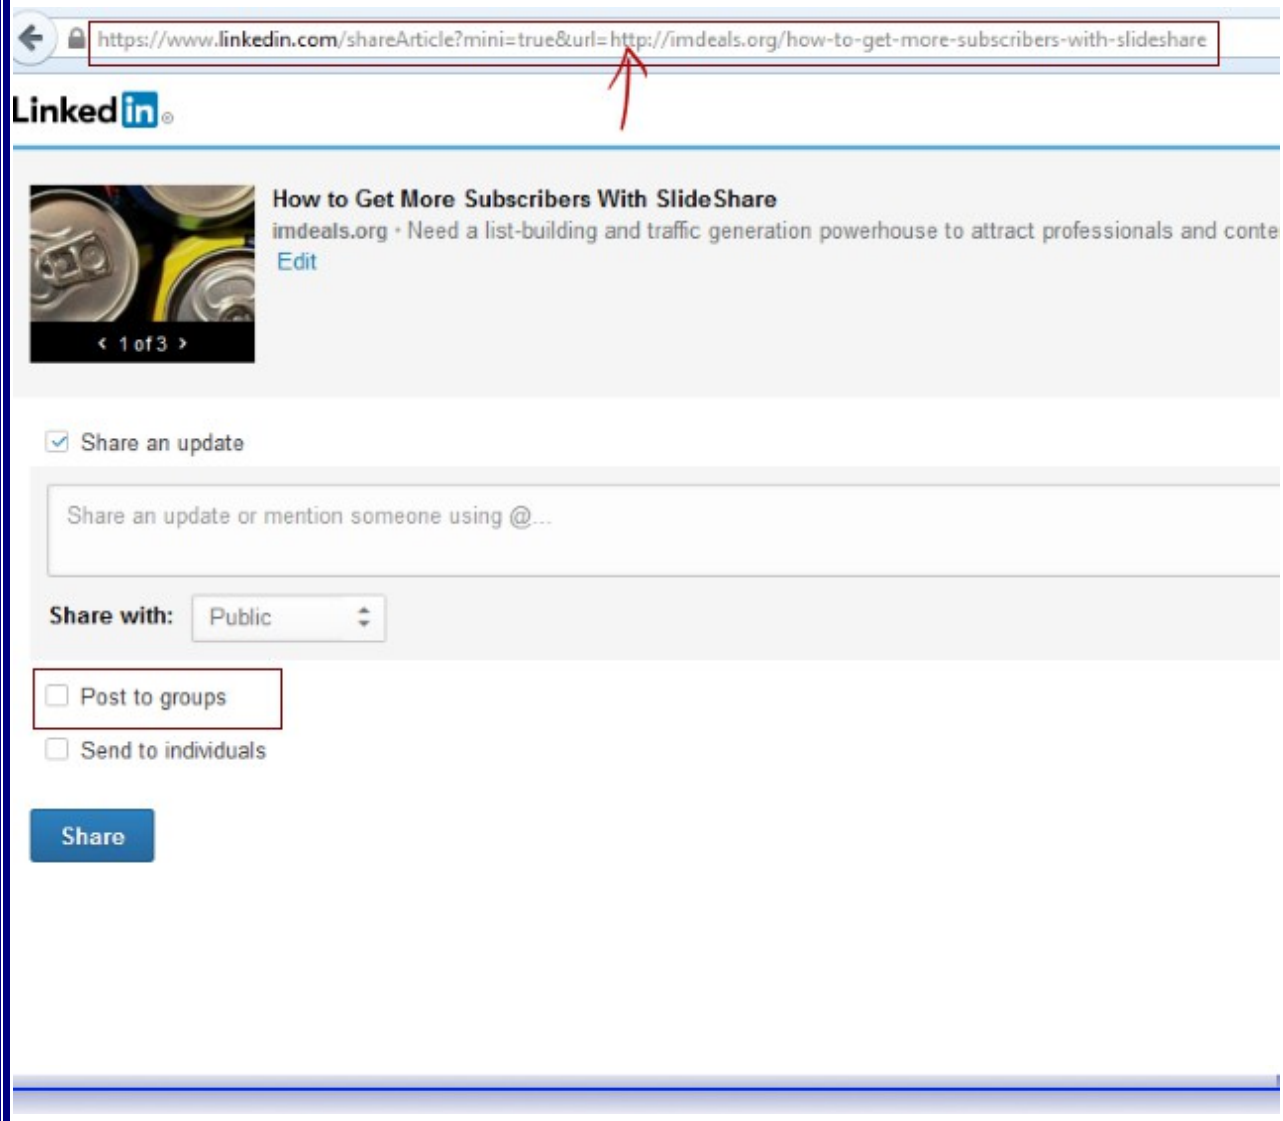

Now follow this url:

http://www.linkedin.com/shareArticle?mini=true&url=http://YOURSITE.com/your-video-or-article

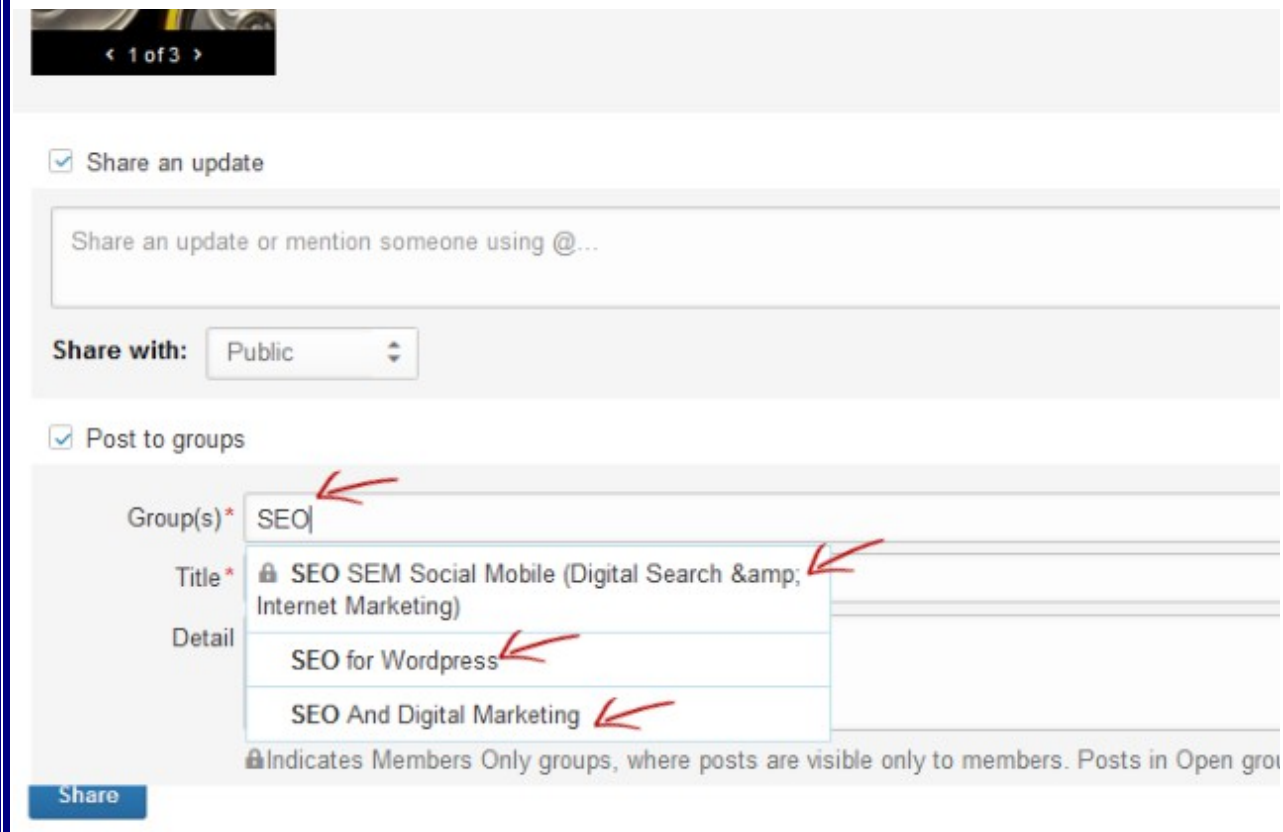

Replace the portion marked with blue color with your blog post url. For example I have a blog post url like this: http://imdeals.org/how-to-get-more-subscribers-with-slideshare

So my url will become like this: "**http://www.linkedin.com/shareArticle?mini=true&url=**http://imdeals.org/how-to-get-more-subscribers-with-slideshare"

Now take the entire url and paste it at the browser of your linkedIn account and you'll get a page like the image below.

You can share this article with all the 50 group members. They will see the notification once they login to their LinkedIn account. To share your content, keep checked the “Share an update” box, keep “Share with” at Public and check “post to group” box. Checking post to group box will open a drop-down box below, where you can type and select the name of all the 50 group. Hit share button to complete the process.

Calculate now, how many eyeballs could see your article, if your 50 groups has 3000 members in average!

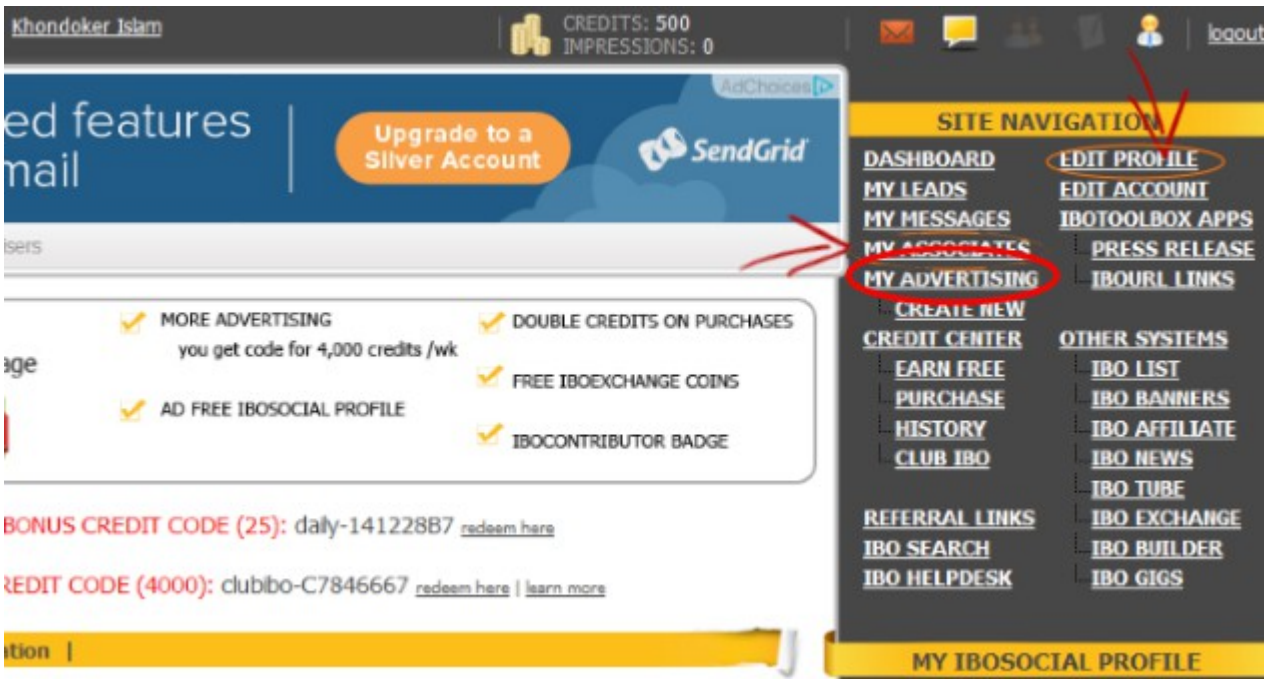

Jackpot 03: Ibotoolbox Traffic

Not very popular among most marketers, but a very useful tool to access massive Internet traffic. Ibotoolbox at Ibotoolbox.com is a popular social network for business owners. At least 50000 people visit the site each day.

So how this site works? The site allows you to post content to other members. You can write on some common business problems and solutions. These are called “press release”. Your press release will get attention of other members. This is one way to grab attention.

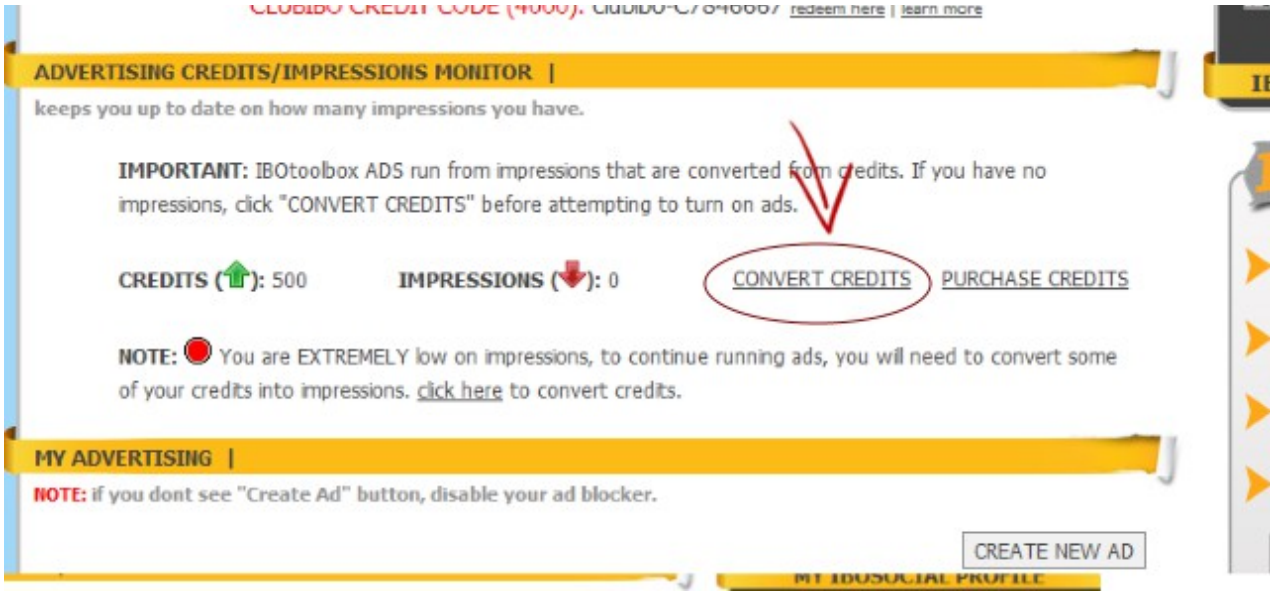

But the cool part is they also allow you 500 advertisement credits for joining, and you'll get 500 advertisement credits each week! Moreover, you can earn credits posting press releases! I'll show you how to get traffic from Ibo Toolbox in a minute.

Go to http://ibotoolbox.com/ and create your free account. Login to the site and fill up as much profile info as possible clicking “Edit Profile” . Check “Acceptable Use Policy” at the bottom of the page.

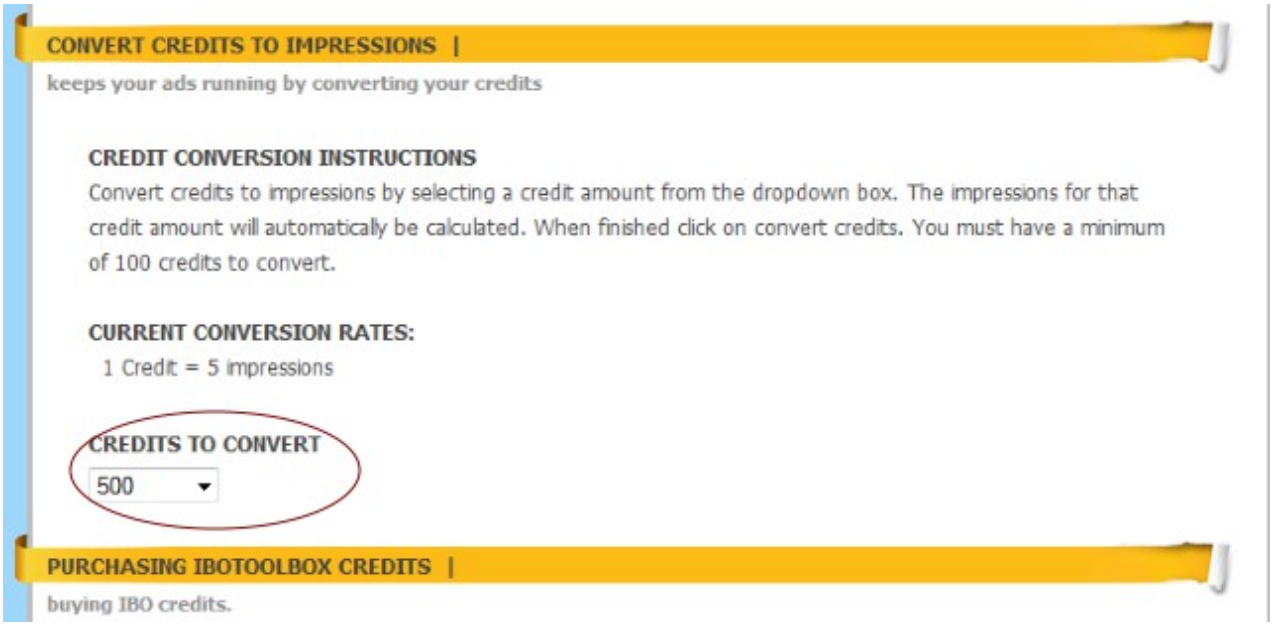

Now click on “My Advertising” and it will take you to the page like below.

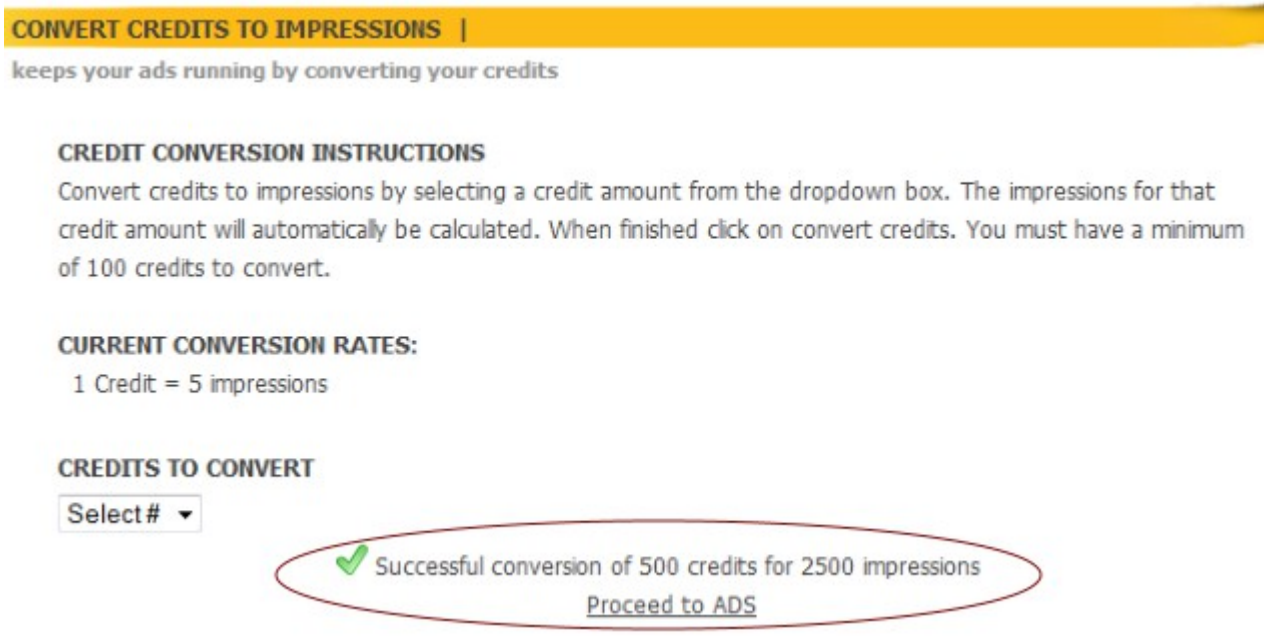

Click on “Convert Credits” as shown in the pic below:

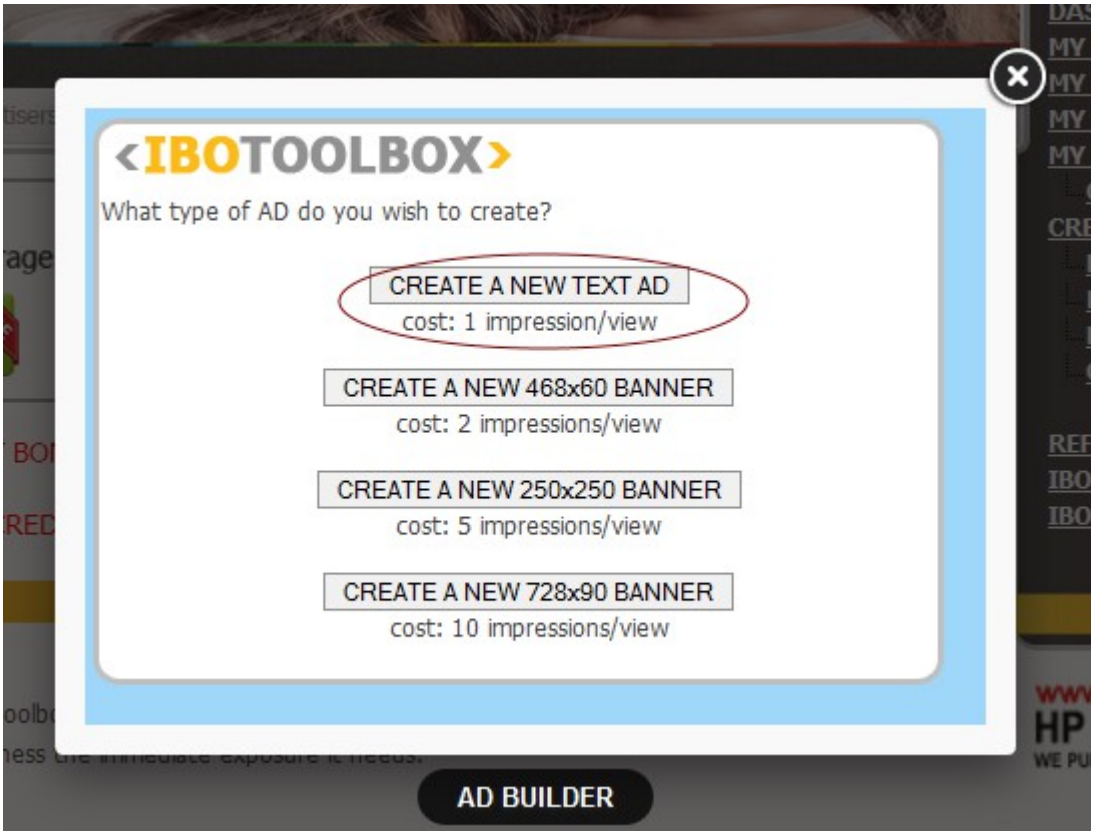

Redeem your 500 credits you earned to sign up and to fill your profile.

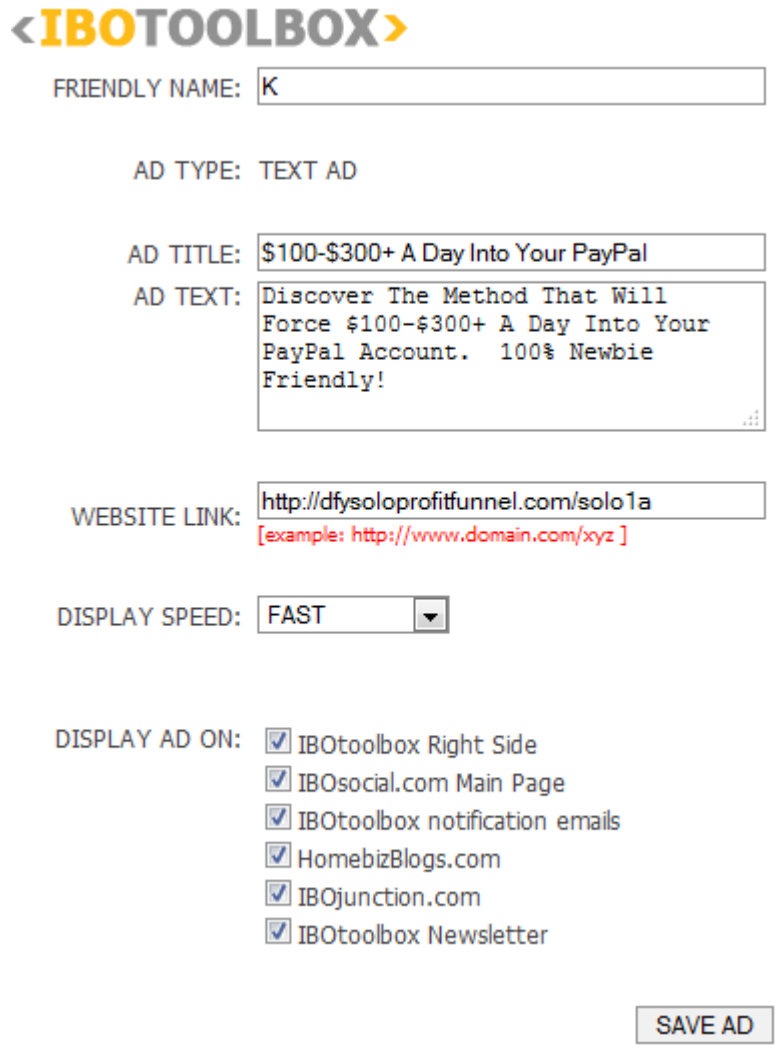

The site calculates your 1 credit point= 5 impressions of your ad. When you select 500 credits from the drop down, a write up will appear at the right side of the drop down box, with the calculation of impressions you are receiving and and a clickable write up will appear as “convert”. Click on it and you are done converting your credits into advertising impressions.

Now, go to the top of the page and click on “Create New” just under “My Advertising”. An ad window will appear, click on “Create a new text ad”. You can go for other types of ad as well. You need to create your banner images with acceptable sizes.

It looks like this after filling out the ad wizard.

Click on save ad after your are done with your ad.

Jackpot 04: Safe Lists

You may have heard about safe list sites, or you may not but these sites can bring an avalanche of traffic to your offer if you play right. Generally, it cost some monthly fee ranging from few dollars to few hundreds dollars but there is a way around to use these sites for free.

So, what safe list sites are all about? The sites allow you to mail hundreds and thousands of their members and let your offer out to them. Moreover, you can place free banner ad, free traffic links and other free traffic options!

Most safe list sites will allow you FREE Coupon to join their site and test their traffic. Redemption of your FREE coupon will give you enough credit to send, one to few emails, and use one to few banner ads and other traffic methods they have. If you want more, you have to buy credits.

So, you can use a safe list sites only one time for free because they will capture your IP address and will not allow you to make more than one account. But there are hundreds and hundreds of safe list sites (a list will be

provided to you later.) If you use each site only one time, you can generate enough traffic to your offer. And these all are free of cost.

You can take other routes, if you want to use the FREE COUPONS multiple times creating multiple accounts. You need to use TOR Browser or any other IP hiding tools. But We do not recommend this route unless you are familiar with this.

You need to be prepared before you make an account with any of the sites. You'll need three things like:

1 A squeeze page with a give-away product

2. OTO Product.

3 Your Welcome email and email sequence

4. A pre-written email to use at safe list sites

5 A banner graphics

1. You must keep your squeeze page ready before you start creating accounts at the safe list sites (we will provide the site list later in this section). This will ensure you are making good use of your efforts by capturing emails from the

free traffic sources. You can use a simple one step, two or three-step squeeze page with your free gift. You can use a one page or multiple page reverse squeeze page. It's up to you.

I use is a simple looking squeeze page like below, and it is giving me amazing conversion!

You'll also need a free report to give away. Get a plr report if you do not have anything yet. There are many plr product sites in the internet. Search Google for it!

2. You should redirect your visitor to a OTO (One Time Offer) page immediately after they opt-in by your squeeze page. This OTO could be your own product or an affiliate product. This set up will maximize your chance to profit from your subscribers.

3 You should arrange to send a welcome email with the download link, immediately after your visitors insert their emails in your opt-in form. You should set up 7 to 15 days pre-written email sequence with affiliate links inside in your auto-responder account.

4 You need to prepare an email to send from the safe list sites. I use a simple email like below.

Email Subject line: *Discover The Method That Will Force $100-$300+ A Day Into Your PayPal!*

Email Body:

Hello there!

Okay, let me start by asking you this simple question:

Are you looking forward to an easy way to make money online?

Here's a good news for you if you are. Your quest for making money from the Internet is about to materialize.

You are about to get a full proof simple 3 step money making method with all the tools needed. Consider this an opportunity of a life time and click on the link here.

You won't regret, it's a guarantee!

Khondoker

Your Free Online Coach!

5. You should keep a banner ready if you want to use banner ad option. Note that image size of different sites may vary. So, you must be familiar editing/ resizing images, if you want to use this option.

Okay, Now go to **this site** and you'll get at least 200 safe list sites. **Here** you'll get a list of 100 sites. But before you get there, you must consider doing

following step very seriously.

Important Note:

You must create and use a separate email account to register with the safe-list sites. The amount of emails you will receive (after becoming a free member) will blow your mind. But you must understand that's way it works! So, be prepared and make a separate account for this purpose.

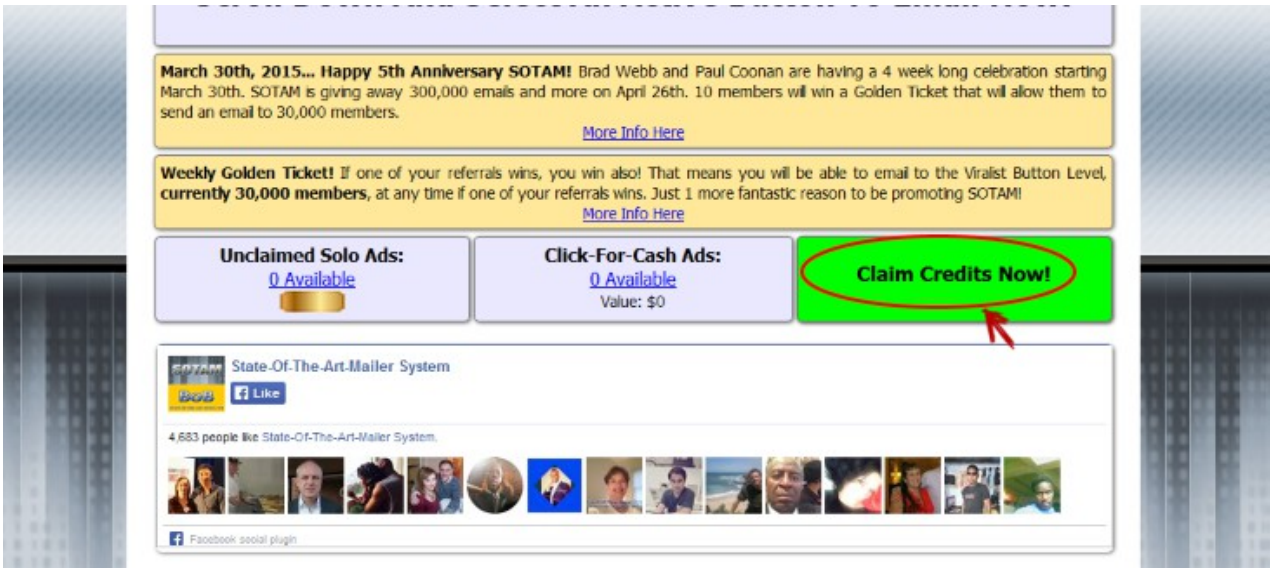

Let's get familiar with the safe list site interface. Most of the sites works pretty much same way and their dashboard are almost identical. So we made a free account at a site named “State Of Art Mailer” and the address is: http://state-of-the-art-mailer.com/index.php.

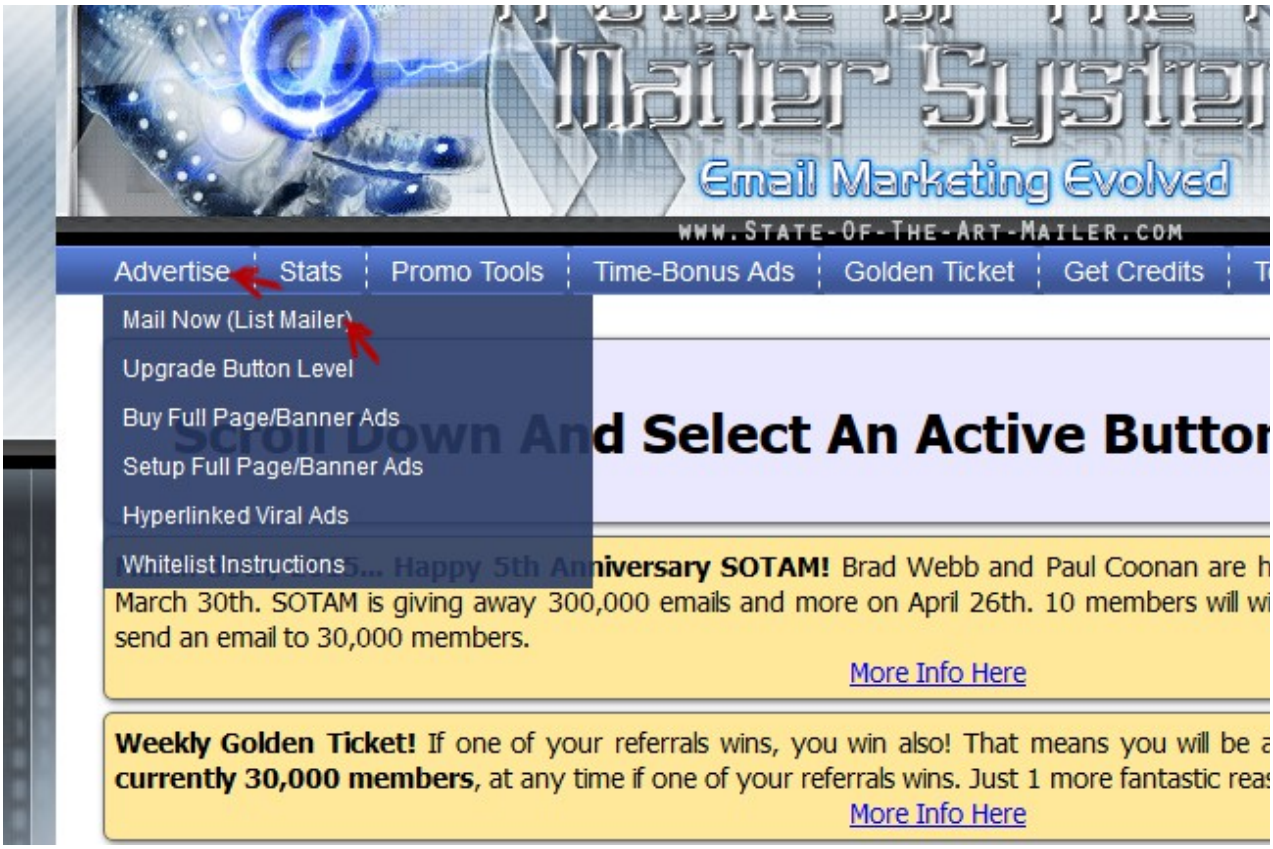

Fill out the form using the new email you have created, and you'll get an email immediately prompting to confirm your membership. Click on the confirmation link of the email. Now go to the site and login. You may have a scary experience because you'll be forwarded to offer after the offer after you log in, but don't panic. Look for either find “Click here to skip this advertisement .....” link or “no thanks” link at the bottom of the page. Do this until you reach the dashboard.

After you have skipped all the offers, you'll get to the main page. The first thing you'll be looking is to redeem your FREE Credits.

Clicking on “Claim Credits Now” and go back to main page and click on “Advertise” and select “Mail Now: List Mailer” from the drop down menu.

At the next page you will get many option but these will be not covered by the amount of credits you have currently, so scroll down until you find “Mail 500 Members” button.

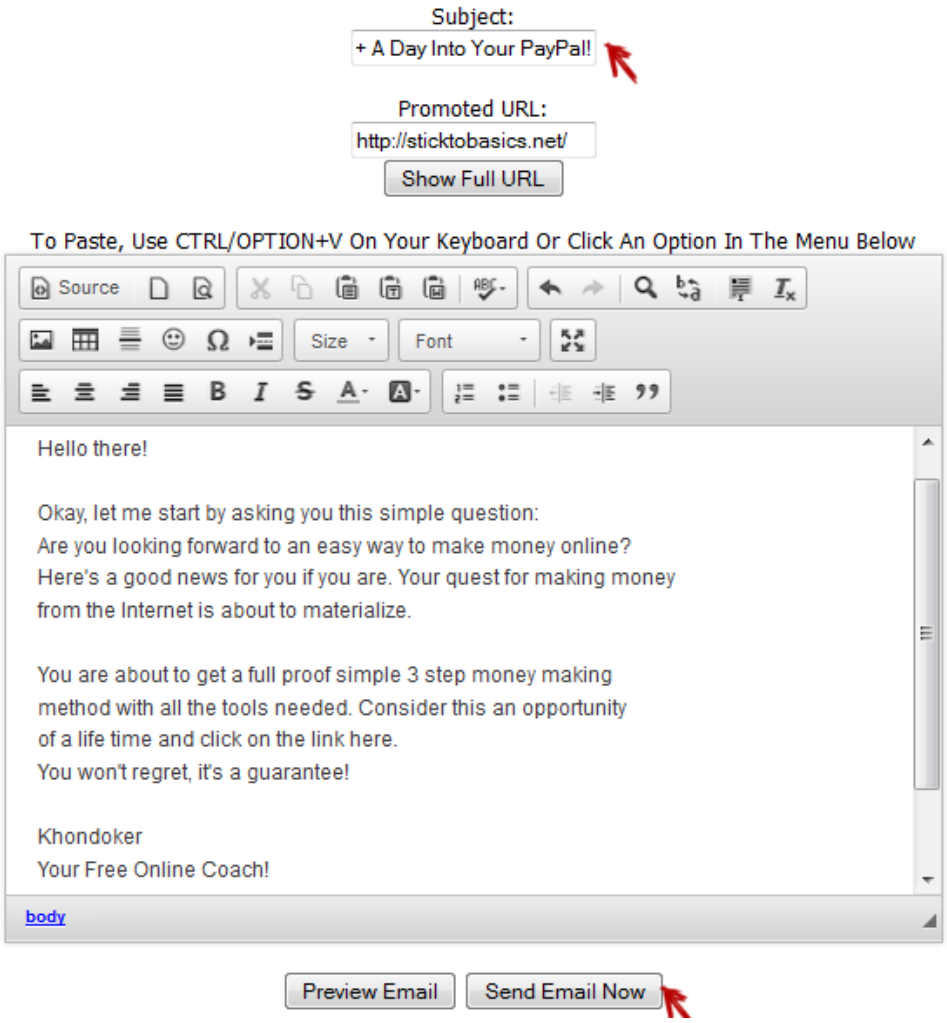

Clicking the button will take you to the page bellow.

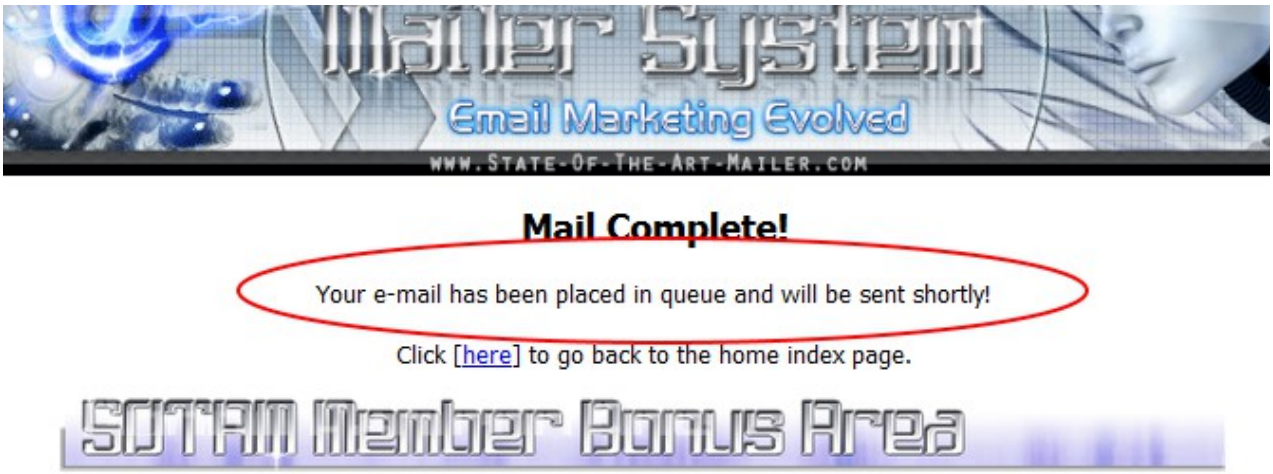

Insert the url of your squeeze page you already prepared. Note that you cannot insert any link inside your email. So the link of the page you want to send the traffic must be inserted here.

After you have inserted your squeeze page url and hit “Submit URL”, a test will run to determine your url is alright, wait for few second and let the test run. If your url is okay, the emailer page will be opened. Fill out the form with the email you already prepared and click on “Send”.

You are through sending your first bulk mail if you are taken to this page bellow.

Like I said, interface of most of the safe lists sites are pretty much similar. So there should be no hazard sending bulk mails using other sites of the list.

Jackpot 05: Slide Share

This site, Slide Share at **http://www.slideshare.net** is a traffic marketing sleeping giant, marketers have yet to tap into its full potential. The site averaged 60 million unique visitors a month and 215 million page views in the last quarter of 2013. It is among the top 120 most-visited Web sites in the world! Let me share some statistical fact about this site:

Slide Share receives 500 percent more traffic from business owners than Facebook, Twitter, YouTube, and LinkedIn and 20% of the visitors comes directly from Google. Mobile views on Slide Share are also on the rise, having seen a 223 percent jump from last year (2012). The top 5 traffic referrers to Slide Share were blogger, Facebook, Word press, LinkedIn, and Twitter in 2013.

Can you believe that? Can you foresee the traffic potentials here? It's huge! The traffic is packed with business owners, so it could be assumed easily that they will not hesitate to pay money for right info.

Okay, let's get to action if you don't have any doubt on Slide Share traffic potentials. This site will let you post your content in their platform in two

formats. You can post your content as the slide show, or you can post your content as pdf format. So before you upload your content to Slide Share, your content must be in either pdf or slide show. Well, if you don't know yet how to turn your content in those formats, please go through these YouTube videos below:

For Making PDF Files: **https://www.youtube.com/watch?v=dsWUFiE4tZs**

For Making Slide Shows: **https://www.youtube.com/watch?v=knV7cUCT94o**

Preparing your content for Slide Share is not hard. You have to note that shorter and more visual content saw the most success in the recent years on Slide Share. The average number of slides per presentation fell by 4 slides from last year, from 18.8 to 14.4. In line with the current trend, there were also 29 percent fewer words per slide in 2013.

So, the better content type would be:

not more than 3-4 short sentences per slide or page.

Not more than 12-14 slides or pages for the whole content.

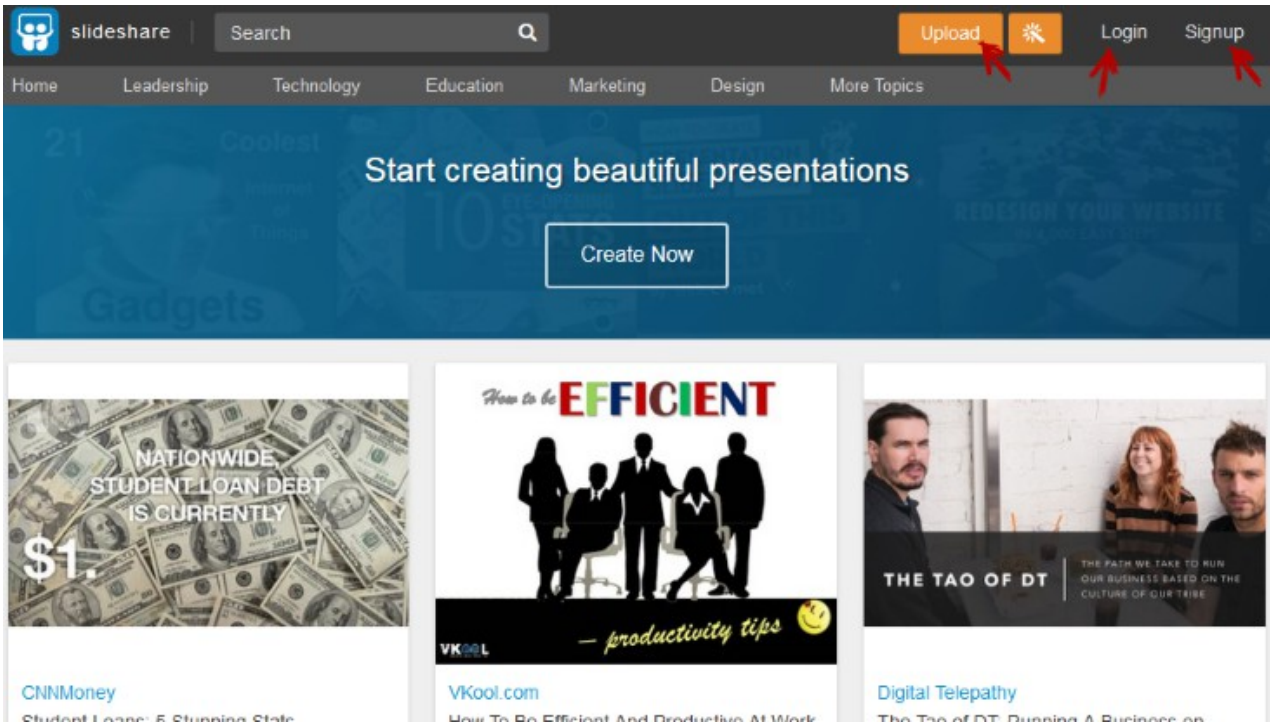

Relevant Images or info-graphics in the slides or pages.

And of course your links inside, importantly at the end of slide show or pdf files.

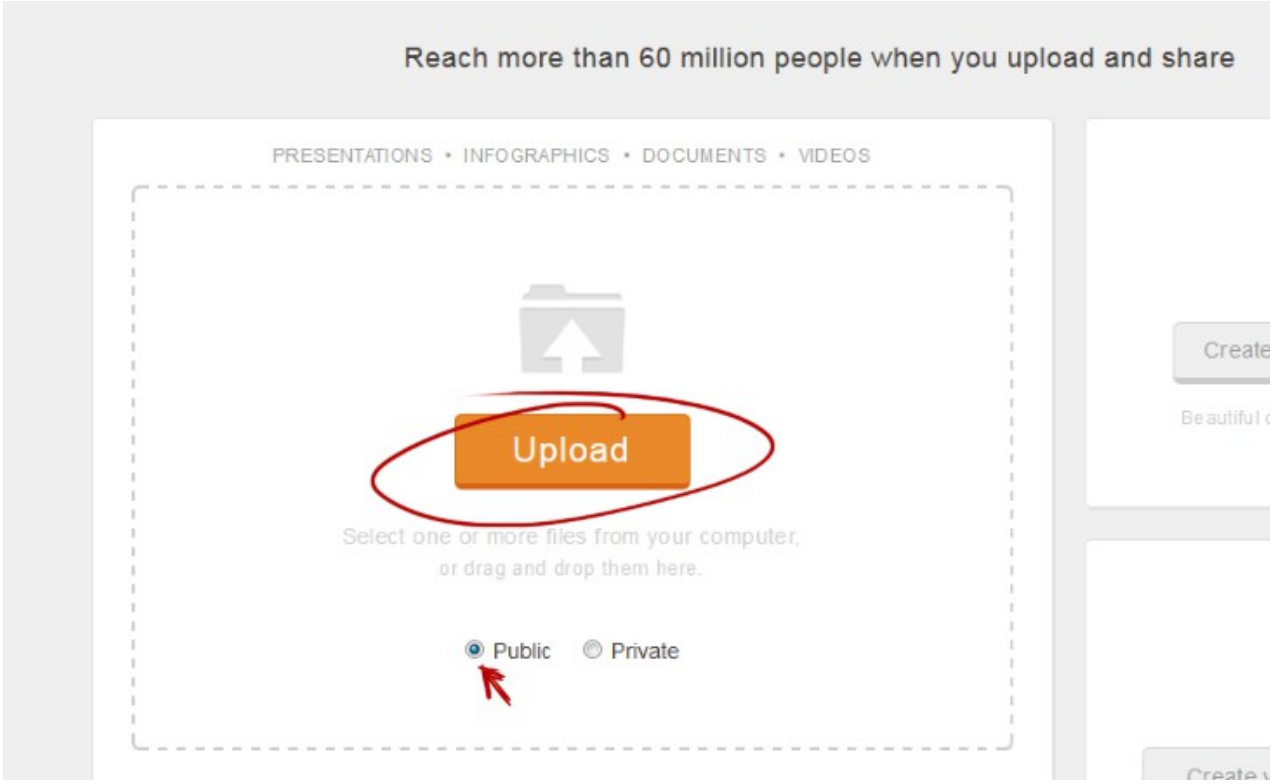

So the content would be more like headlines of a presentation rather than details of each headline and sub-headlines.

Important: You need to prepare a short description of your content before you submit it to Slide Share. It will let your readers know what's your content all about. It could be 3-4 lines, or it could be more. In addition, you should prepare a number of relevant keywords to your content. Carry out some research to come up with high searched keywords. It will come handy for Google's indexing.

Now that your content format (in slide show or pdf), it's description and keywords are ready, let us head over to Slide Share site at **http://www.slideshare.net**, and sign up for a free account if you do not have yet.

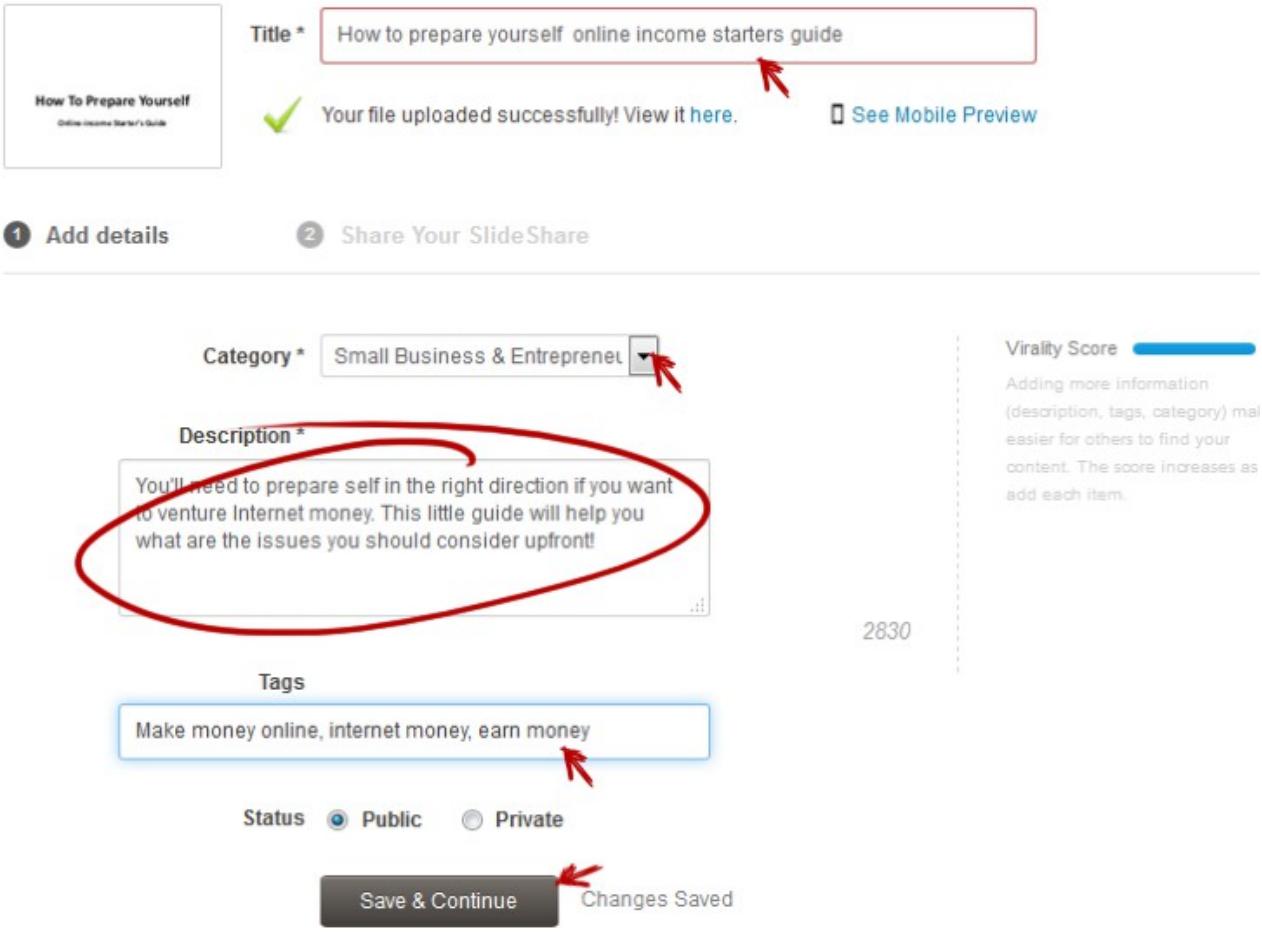

Login to your account and click on “Upload”. You'll be taken to a page like this:

Select “Public” because we want to show our content as many eyeballs as possible, the more the better. Then click on “Upload” again. Here the interface will let you browse your computer and select your pdf or Slide show file.

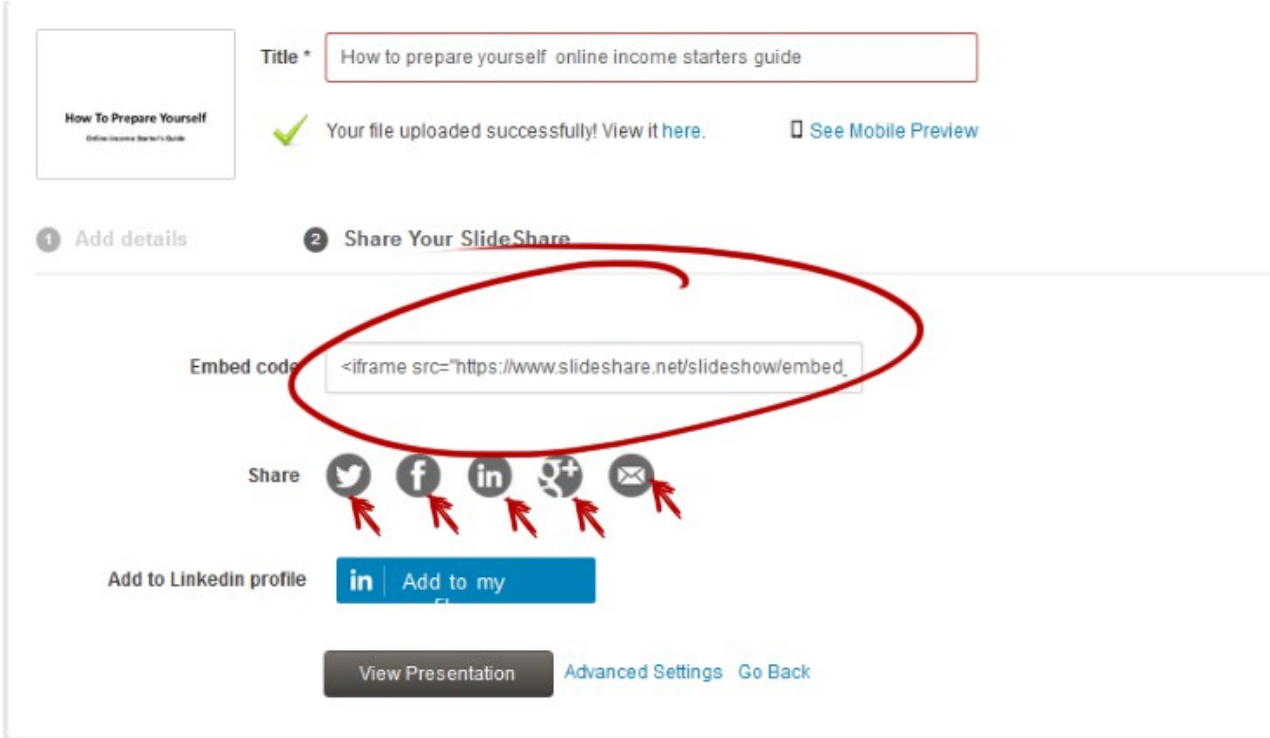

Selecting the file you already prepared for this purpose will start uploading

process automatically and a new page will open as bellow:

Title of your content will already be there, you need to select the “Category”, fill out the “Description” and “Tags” fields. And then hit “Save & Continue”.

And that's it. You have successfully uploaded your content to Slide Share. You'll be taken to next page and from here you can get an embed code to use to your site. You also can share your content to a number of social sites from this page. A confirmation email will be there in your in-box with confirmation.

Jackpot 06: Kindle eBook

This is my favorite, and I am getting a healthy number of fresh opt-ins using this method. I learned this method from my mentor **Bryan Harkins**. In this method, you need to prepare small e-books around 30-35 pages and upload it to Amazons "KDP Select" program. You write the book from scratch, or re-write from PLR e-books or outsource your book is up to you. Only thing is that, it should be unique to qualify under the program, and you have to agree that you are not going to publish it anywhere else as long it is live at "KDP select program."

The benefit to enrolling your book in the "KDP Select program" is that you are allowed to give your book for free in the Kindle Marketplace for 5 days out of every 90 days. The readers will utilize this opportunity to download your books for free within these 5 days!

When you give your book for free, you can get over 1,000 people to download your book without much effort on your end, which will typically result in an easy 100+ subscribers…normally a lot more than that.

So how traffic is generated to your offer from kindle e-book? You are going to leave links to your offer in the book! At the very beginning of your book, right before the intro you will have a section that is thanking them for purchasing your book (even though most of them will have downloaded it for free). You will basically say something like:

"*Thank you so much for purchasing this book and putting your trust in me. As a valued customer, I just wanted to let you know I have created a special free gift for you to download. To download this free gift just head over to http://Your-Site.com, leave your email address, and I will send you the free gift instantly.*"

Then leave a picture to the free gift right below so that they can see what they are missing out if they don't head over to your squeeze page to download it.

Kindle e-book has some special characteristics. You need to arrange all the issues correctly before uploading it to the kindle store. Below I am going to discuss all the issues need to be addressed. Follow the steps and you'll be through easily.

Step 1: You have to prepare a unique report of around 2500- 5000 words in the niche of your choice.

Step 2: Divide your report in to following self-explanatory sections/ chapters: Title, Sub-Title, Author Name, Copyrights, Table of Contents, Preface, Chapters (ie 1,2,3 etc.) and conclusion. That's all. You'll leave your link in the preface and remind your readers placing a link at the end of the report.

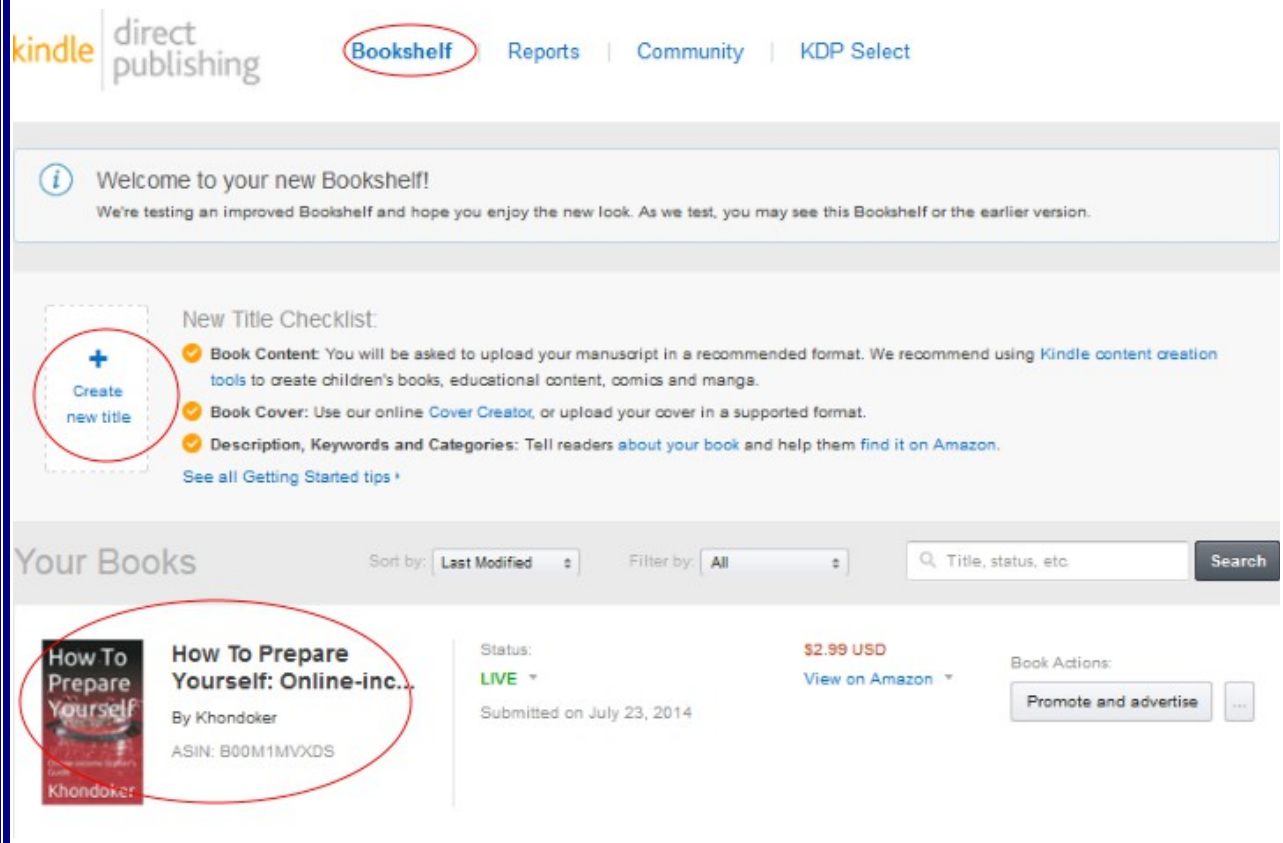

Step 3: You need to design a flat book cover for your book. The size is 625X1000 px. You can make your own design or have it done from www.fiverr.com for $5.50.

Step 4: Prepare a short description of your book (around 5-6 lines)

Step 5: Keep at least seven keywords for your book ready.

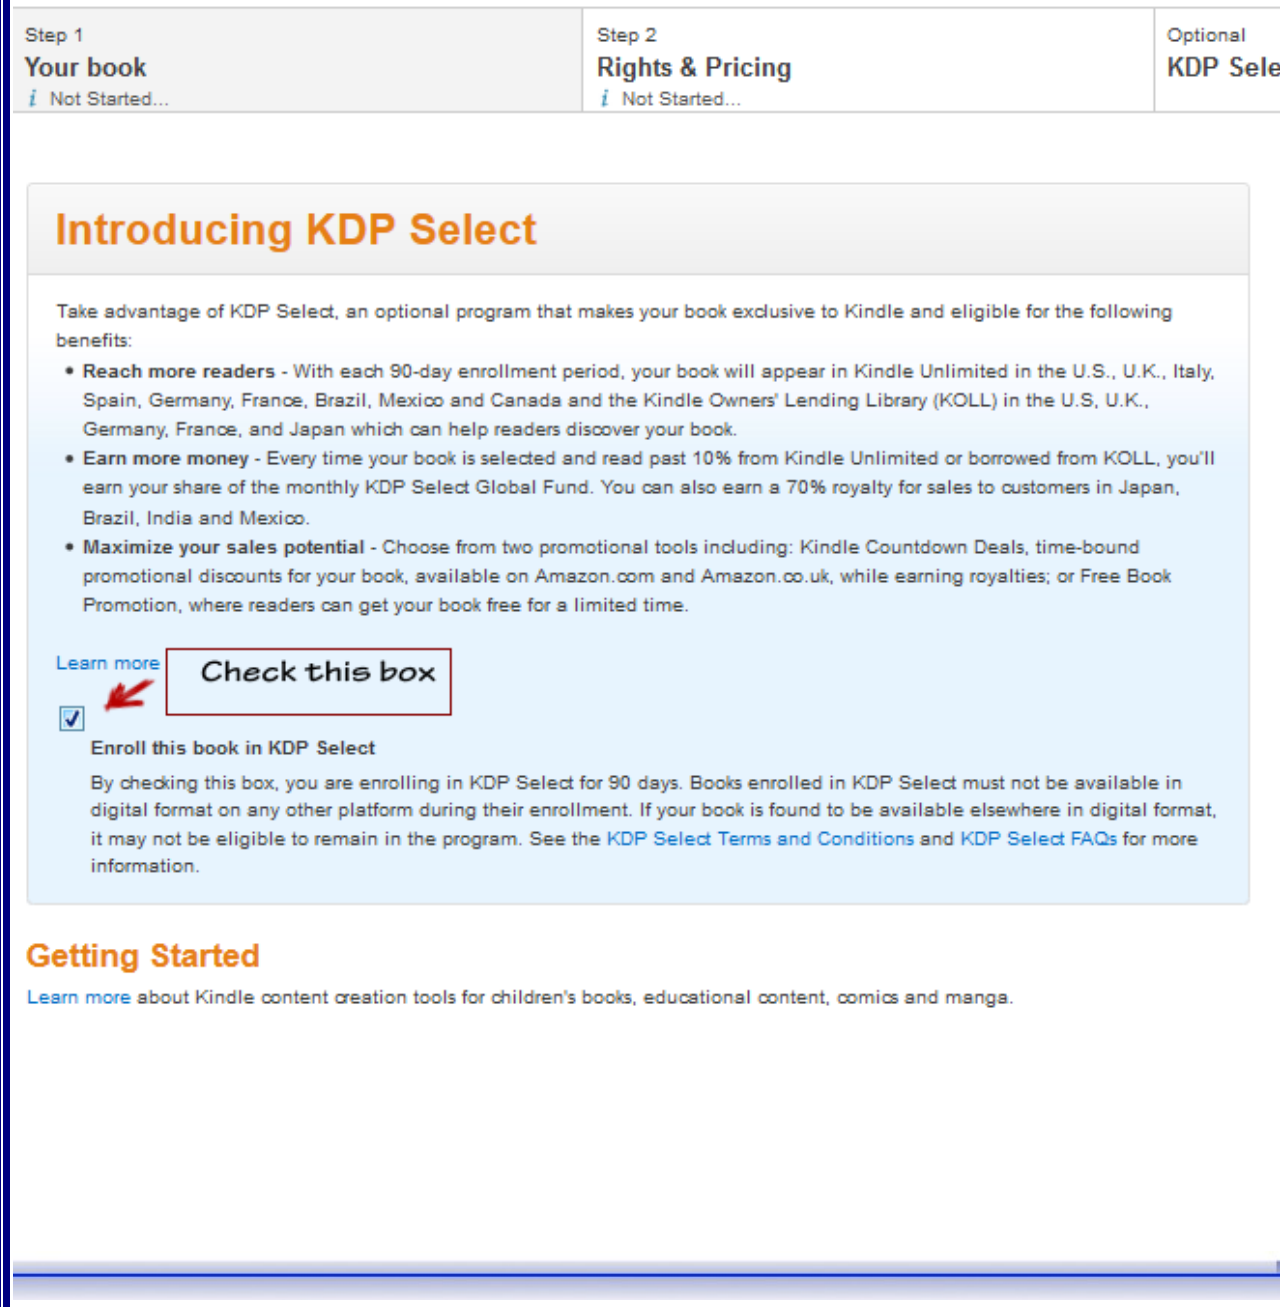

Step 6: Now make an account at https://kdp.amazon.com if you do not have already.

Step 7: After you login to your account, you'll be taken to this page below. I have published a few kindle e-books, so the books are showing in this page. If this is your first submit, the page will be empty. To submit your first book, click on “Create New Title”.

Clicking on the “Create New Title” will take you to a new page. It's a long page

so, I'm breaking the one page in to few screen shots serially:

Getting Started

Learn more about Kindle content creation tools for children's books, educational content, comics and manga.

1. Enter Your Book Details

Book name

Just write the title of your book

Please enter the exact title only. Books submitted with extra words in this field will not be published. (Why?)

Subtitle (optional)

Leave blank if you don't have a subtitle, if you do have a subtitle then write it here.

Please enter the exact subtitle only. Books submitted with extra words in this field will not be published. (Why?)

Leave that unchecked (unless of course your book is part of a series)

☐ This book is part of a series (What's this?)

Edition number (optional) (What's this?)

Leave this blank

Publisher (optional) Publishers use the publisher label to categorize their books based on content type, genre, book size, or other criteria.

Leave this blank

Description (What's this?)

This is where you will leave the description of your book. This is where you want to let people know what your book is all about and why they should purchase (or download) it. I usually take some time to fill this part out, I notice that when I have a good description I tend to get more downloads when the book is free.

Amazon.es	Set ES price automatically based on US price €2.99	70%	€0.02	€1.72*

Congratulation! You have uploaded your first kindle ebook at Amazon kindle store's KDP Select Program. You'll be notified within few hours that, your book is live.

There is another important step is left to be done after it is live. That is, giving your book away for free for 5 days.

Click on the “Bookshelf”. Your e-book will be there. Hover your mouse in the place show in the picture below:

Clicking on “KDP select Info” will let you choose your free 5 days.

Note that, uploading one book may bring you 25 to 100 subscribers in these 5 days. Then there may be some or no subscribers for 90 days. So, you can see

that only one book will not bring enough subscribers. You need to upload at least 12-18 books or more, so that every now and then there will be a book available for free! Can you do it in one week? I have doubts! But you do not have to! Take your time. Prepare one book a week or one in 15 days. Your book shelf will have enough books in six months or in a year. Is it worth? You bet! You are doing it for lifetimes benefit. Each book will supply you subscribers for 5 days in every 90 days, and it will be continued as far as the Amazon kindle store is up!

Good news is, you'll make some money from your books as well! The books will be free for 5 days, that will bring you subscribers. Some readers will buy your books when they are not free (90 days), and a nice passive income will generate for you in the Amazon KDP account!

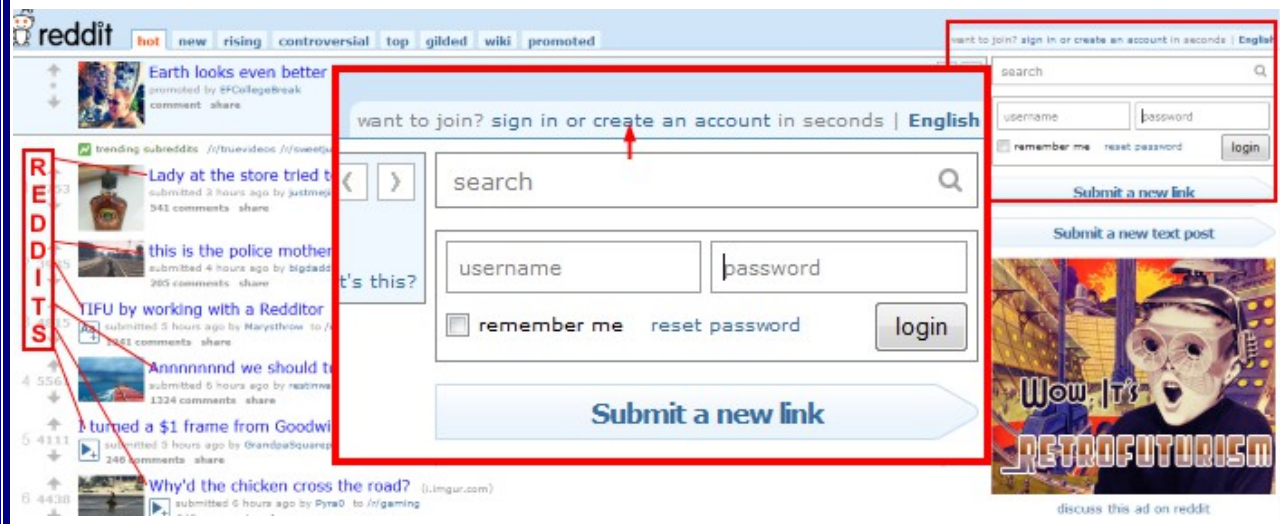

Jackpot 07: Reddit Traffic

This site reddit, at http://www.reddit.com is one of my favorite traffic jackpots. Why? Because the site enjoys a whopping 168.5 million unique visitors in one month and they comes from 208 different countries! What could be a better traffic jackpot than this? You should strive to get a piece of action from here! Let's get to know how Reddit works.

Reddit allows members to share links and images in it's bulletin board type interface and other members can “Up Vote” or “Down vote” according to their likings. The site has rating system on the members activity and allocate points according to the members contribution to the Reddit community. In here they call it “Karma” point. There are “link karma”, “Comment Karma” and “Profile Karma”. All the karma points depend on how other members reacts on your submitted links, images or profile. Below we will show how to increase your karma points.

Obviously, the first thing you have to do is to create an account at Reddit site, if you don't have one already. It's free, simple and straight forward to create one.

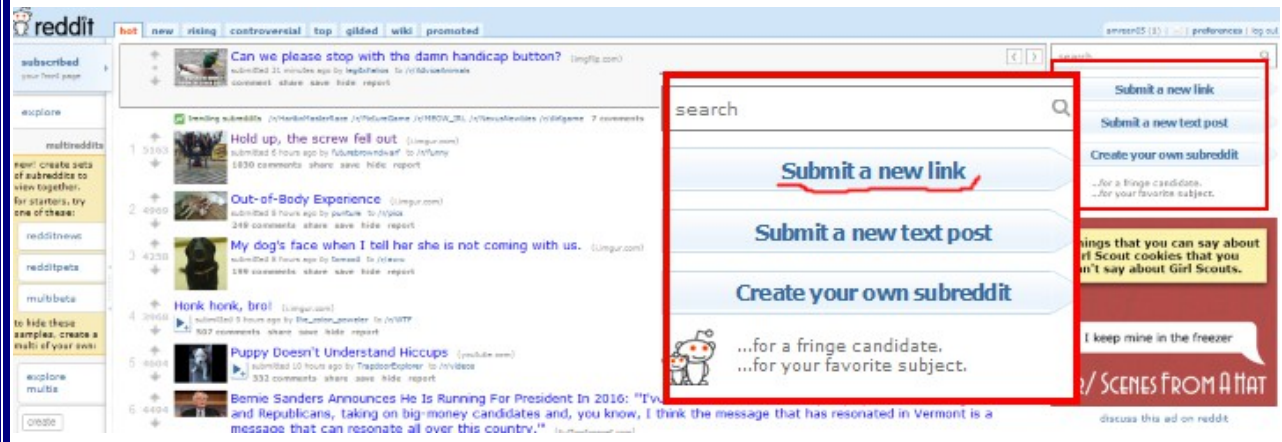

While creating your account, you have to note that it is a community of real people and they will not trust you if you hide behind your profile. So, fill out the account with your real identity. Reddit allows you to create 3 accounts per IP address. So make other two support accounts and use these profiles to enrich the link karma point of your main account.

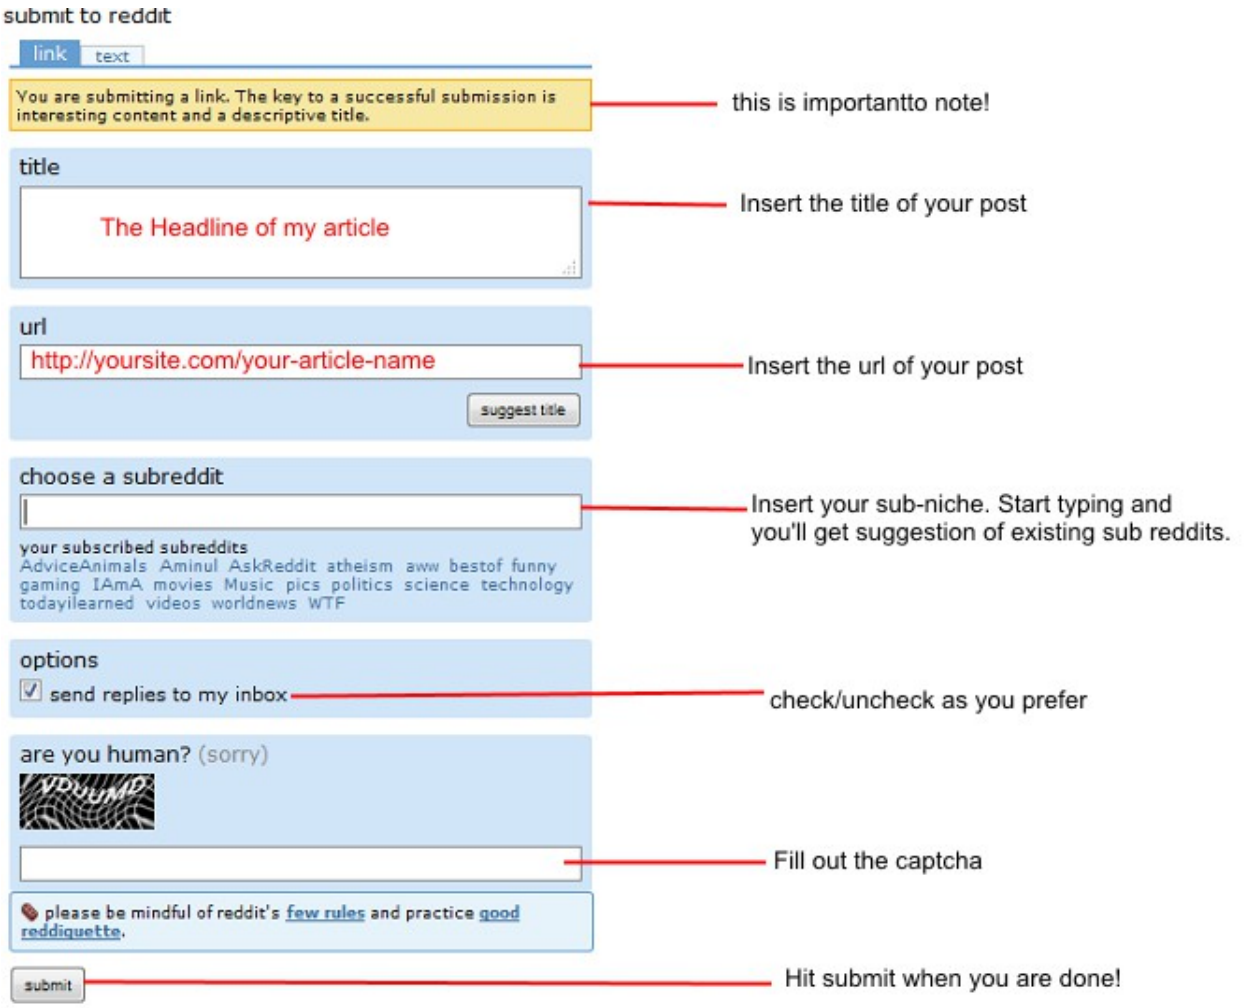

Do not start submitting your links once you create your account. Because you

will need 50-100 link karma first, before you promote your own link. You can gain link karma by giving “Up Vote” to other members links.

Submitting your link is pretty straight forward. Click on “submit a new link” at the right top corner.

It will take you to a window like below.

Like I said, posting links here is easy but you must practice the do's and don'ts of Reddit while posting your links. Don't Spam. No child pornography here.

Don’t post your personal information and don’t mention “up-vote please”.

There are also some other rules which are not clearly mentioned but you have to follow to avoid complete or shadow ban on Reddit. You must Always submit link in most relevant category/sub-reddit.

You can easily attract the Reddit audience to get their vote for your images and links. Always make sure that write interesting eye catching title for your post. Description of your post should be what your post about and catch the attention of reader. Don’t use Reddit suggestion as it will not provide you attractive title. Trending or events images are very handy to gain more votes. You can use your two secondary accounts to up-vote your image. We recommend you also join some up-vote exchange Facebook groups. Here are some of the facebook groups:

https://www.facebook.com/groups/redditPro

https://www.facebook.com/groups/734121159964581

https://www.facebook.com/groups/Votemefast

https://www.facebook.com/groups/RedditUpVote

https://www.facebook.com/groups/redditclub

Be aware of “Stealth ban” Account. Reddit can ban your account without giving you any notice! For instance, you have submitted a link and it shows that it has been submitted, however no one can actually see it other than you.

Here is how you'll know if your account got “stealth ban” or not. Login to your account and copy the url of your profile. Logout and then paste the url into your browser. Everything will appear normally if you have not been banned. If “page not found” or “the page you requested does not exist” appears– your account has definitely been banned.

Reddit site is big for traffic. So I would recommend you take your every approaches cautiously. Initially, you should have spent some time exploring Reddit, leaving comments, receiving up-votes and building up your Karma score. If you haven‟t done any of these things yet it is important to do so immediately. Your success with Reddit depends on it. You can't expect to receive any benefits of the platform without giving first.

Reddit is not like other social networks that are getting filled up with spammers and dead users. It has a strong and very active spamming filter which can catch you easily if you do not follow even a single rule, but if you do it very carefully, you can easily generate mass traffic you never seen before.

Jackpot 08: Forum Marketing

Forum marketing is a traffic jackpot that most of the Internet marketer knows but only a handful of them practices it regularly. I doubt if there is any veteran Internet marketer that didn't start forum marketing. Why? Because they know how powerful, how niche specific and lead generating traffic source this could be! But most of them lose focus fast, maybe for some other pressing needs. Some of them come back occasionally and some never come back. Yet, 15 minutes of work a day on forum could bring enough targeted traffic to your offer! Ask any Internet marketer, Internet marketing guru or online mentor. All of them will not hesitate to admit instantly, that forum marketing is a powerful traffic jackpot!

Starting forum marketing and doing it consistently will never turn you down for traffic. So why not start hitting the forum marketing traffic jackpot right away!

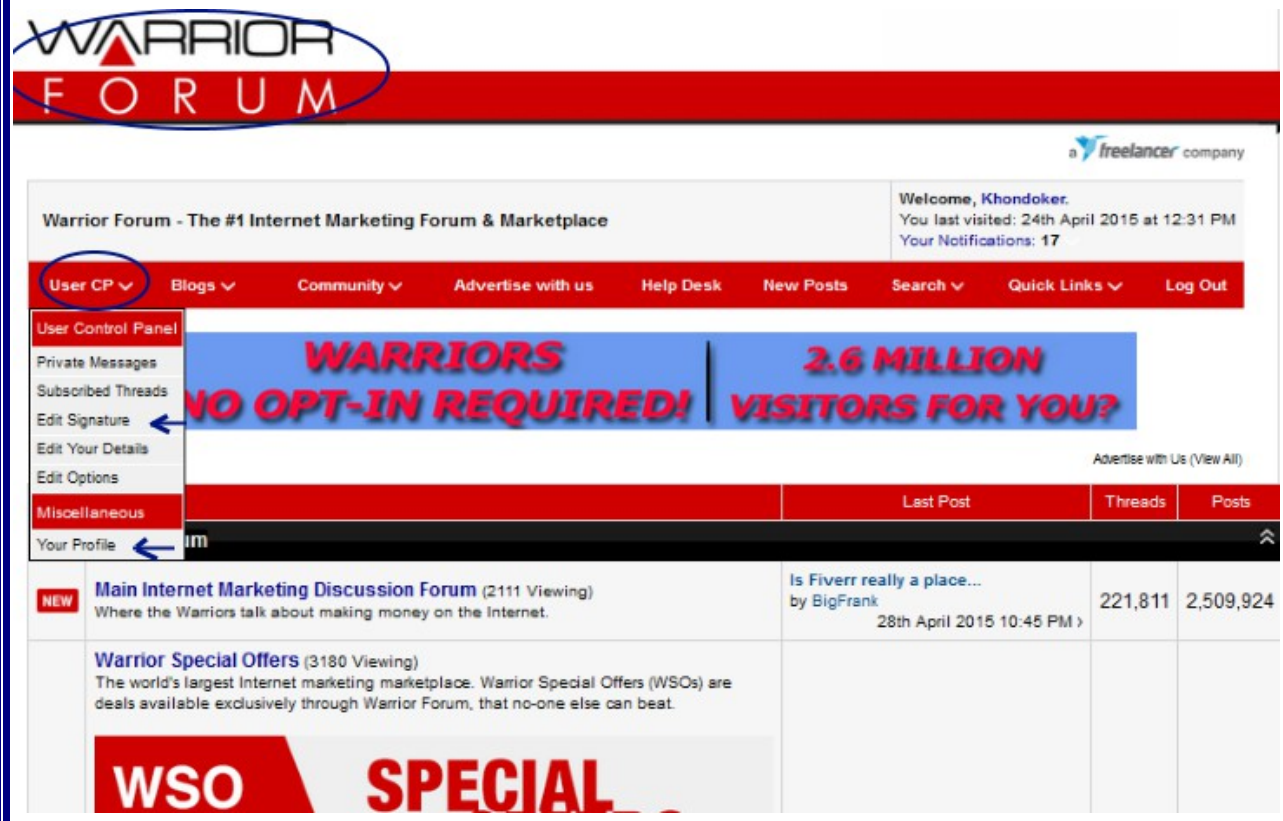

Let's start with understanding what a forum is. Well, forums are discussion groups or bulletin boards allow people to share ideas, seek help, answer

questions, network with others, discover new methods, strategies and get advice from people who share the same hobbies or interests. Most forums will allow a “signature” link that will appear beneath your post. This link is the key for generating traffic to your offer.

Forum marketing starts with finding forums in your niche. This part is easy. There are forums in every niche. All you have to do is to search Google with your niche keyword. But make sure that the forums you select, allow hyper linked signature. This criteria is a must for forum marketing.

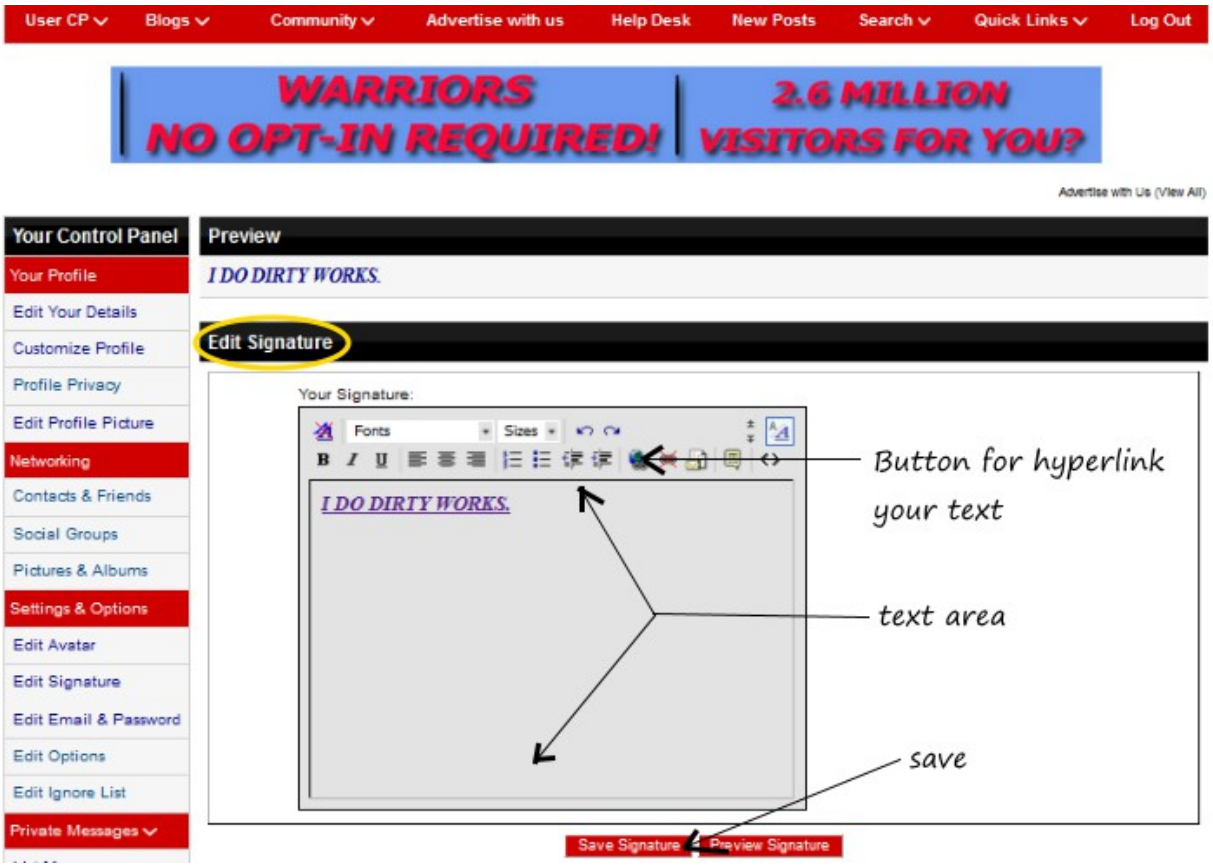

After you could find the popular forums in your niche, make an account there. The first thing you have to do is, read the forum rules carefully. Do not skip this step. It will save you many hazards upfront.

After that, find “User Control panel” in your account. Now, some forum may name it differently. But whatever the name is, the functions are the same. This is your area. You have to brand yourself by giving your profile information.

The best way to brand yourself is to fill out the profile information section with your real identity information and a good smiling real profile picture of you. Don't hide yourself. Would you trust and buy from someone with no photo of themselves and using a nickname? I wouldn't either. There is no

reason to hide behind your profile! You also have the opportunity to make your signature hyper-linked in your user control panel. Below picture is the signature editing window of Warrior Forum.

Now, where to send your traffic. You can link your hyper-linked signature directly to your offer if you have your own product, even you can send them to your site with affiliate offer promotions. But the best strategy is to send the

traffic to you squeeze page. Capture the email of your visitor first and then immediately redirect them to your offer if you have a product. If you don't have a product, you can send them to an affiliate offer. Because you already have the email and can promote multiple offers multiple times! Don't be guilty of not mailing your list. It sounds crazy, but I know so many who have a list but don’t send an email! Don’t be shy to provide value to your list and earn affiliate commissions!

Final word on forum marketing. Forums are traffic jackpots, but it does not mean that you have to spam each thread to let your signature link out! Resist your temptation to post “me too” type of posts. Reply a post with authenticity. Once you find a thread that fits your criteria, you need to find a way to contribute to the discussion. Ask genuine questions, the problems that are really bothering you, and you need to know the solution. Start a new thread on a popular topic that will allow you to continue to post in the thread answering follow up questions or comments.

Jackpot 09: Free Press Release Sites

One of the most powerful methods in the internet that most Internet marketers generally ignore is the “Press Release.” There are a number of free and paid press release submission sites in the net. You can submit press releases of your website, product or offer and have a huge traffic drawn from there. Paid press release sites have their own power but you cannot deny the traffic generation power of free press releases sites as well! I have experienced very good results with free press releases.

You can write your own press releases or you can have it written from Fiverr for merely $5.50. Press releases has special format. You need to note following points if you decide to write your own.

Date & Time, The headline, Sub-headlines, Date line, Introduction, Body, The closing mark, Contact information, Keywords

Below I'm attaching one of my press release as example. I have shown how I used each sections with red.

"Press Release" Example
Reverse Lookup Site Has Strengthened Customer Care To Help Customers Manually Track A Phone number (Headline)

Reverse look up site run by Reen Multimedia has made it possible for you to manually track a phone number with the aid of its help desk in addition to using its database software.(sub headline)

San Antonio, Texas: Apr, 27, 2015.**(dateline) (date & time)** TrackAPhoneNumber.net has recently altered a few of their policies regarding customer care in order to provide enhanced services to their customers. Now, users can not only track a phone number using their software, but also carry out a manual search through assistance from the help desk. Customers who are not confident in their ability to use the software or who are not getting satisfactory results can seek the assistance of the help desk to manually find the owner-identity of anonymous phone calls. In both cases, confidentiality of the search carried out is guaranteed. In order to supplement this, the company has increased the number of their support-staff and has implemented further intensive training to enhance the quality of their customer support. **(Introduction)**

"Manual search service, using our help desk, is introduced to assist those customers who are reluctant to use computers and software," Ame Ames, the company CEO claimed. "With our new system they won't miss out on our services due to their computer shyness." Now, anybody can track a phone number using the services of TrackAPhonenumber.net regardless if it is a cell phone number, unlisted number, or an international number. **(body)**

"We have altered our refund policy slightly after strengthening our customer care," the CEO claimed. If a customer is unsatisfied by the lack of results pulled from the database, he can request the help desk to manually carry out his search before demanding a refund. "We do not want to let-go a single [unhappy] customer," stressed the CEO, "[even if], the number of refund request with us is very low."**(body)**

If you long to find out the identity behind an anonymous phone number, TrackAPhoneNumber.net is the best website for you. Through our services you can acquire a variety of information including: phone number, name, addresses, list of neighbors, list of relations, DoB, other phone numbers in use, offenses and felonies, and much more. **(Closing mark)**

Keywords: track a phone number, trackaphonenumber.net, reverse phone lookup directory **(keywords)**

.....

Now, keywords are very important and you should research properly to select your keywords and use some in your body of press releases. Some site may also have provision to submit keywords while submitting press release. Chances are there that your press release picked by Google news and other big new sites.

Below I'm giving a list of free press release sites and I used most of them in 2015! But note that you do not have to submit one press release to every sites. Submitting 3 to 4 will be enough. Because press releases got re-distributed among sites!

List of Free Press Release Submission Sites:

1. Free-Press-Index.com
2. NewswireToday.co
3. 1888PressRelease.com
4. I-Newswire.co
5. SB Wire.com
6. Free-Press-Release-Center.info
7. Online-PR-News.com
8. Big-News.biz
9. PRLog.org
10. Press-Release-Point.com
11. OpenPR.com

Jackpot Traffic Monetization

Now, you must understand that the characteristics and types of the traffic coming out of traffic jackpots are not the same. For instance, traffic from IMDB site will not be as same as the traffic from LinkedIn site. Selling a “Click Tracking Software” to IMDB traffic would be very difficult but if the product is a TV card, then it would be a different story!

So, each source of traffic has its own characteristics, and if you want to promote your offers to them, you have to take action keeping the traffic characteristics in mind. You have to select the right offers to the right audience. You can send traffic directly to an affiliate offer. But I don't recommend it. Sending your traffic to affiliate offers could make you some commission, but it would be always penny compared by the amount you might have generated with our recommended method.

We recommend placing a funnel (consist of few web pages) in front of your visitors and capture the emails of your visitors first. Having emails in your

database will allow you to promote multiple products multiple times to your subscribers. Unlike placing an affiliate offers upfront (where you are earning commissions only one time) email capturing process will give you commissions multiple times! You can promote to them as long as they don't un-subscribe from your list database.

You'll need two accounts to set up and run a funnel. One is a hosting account, and another is an auto responder account. You need to acquire these two accounts if you want to stay in the Internet marketing business and want to make a living out of it.

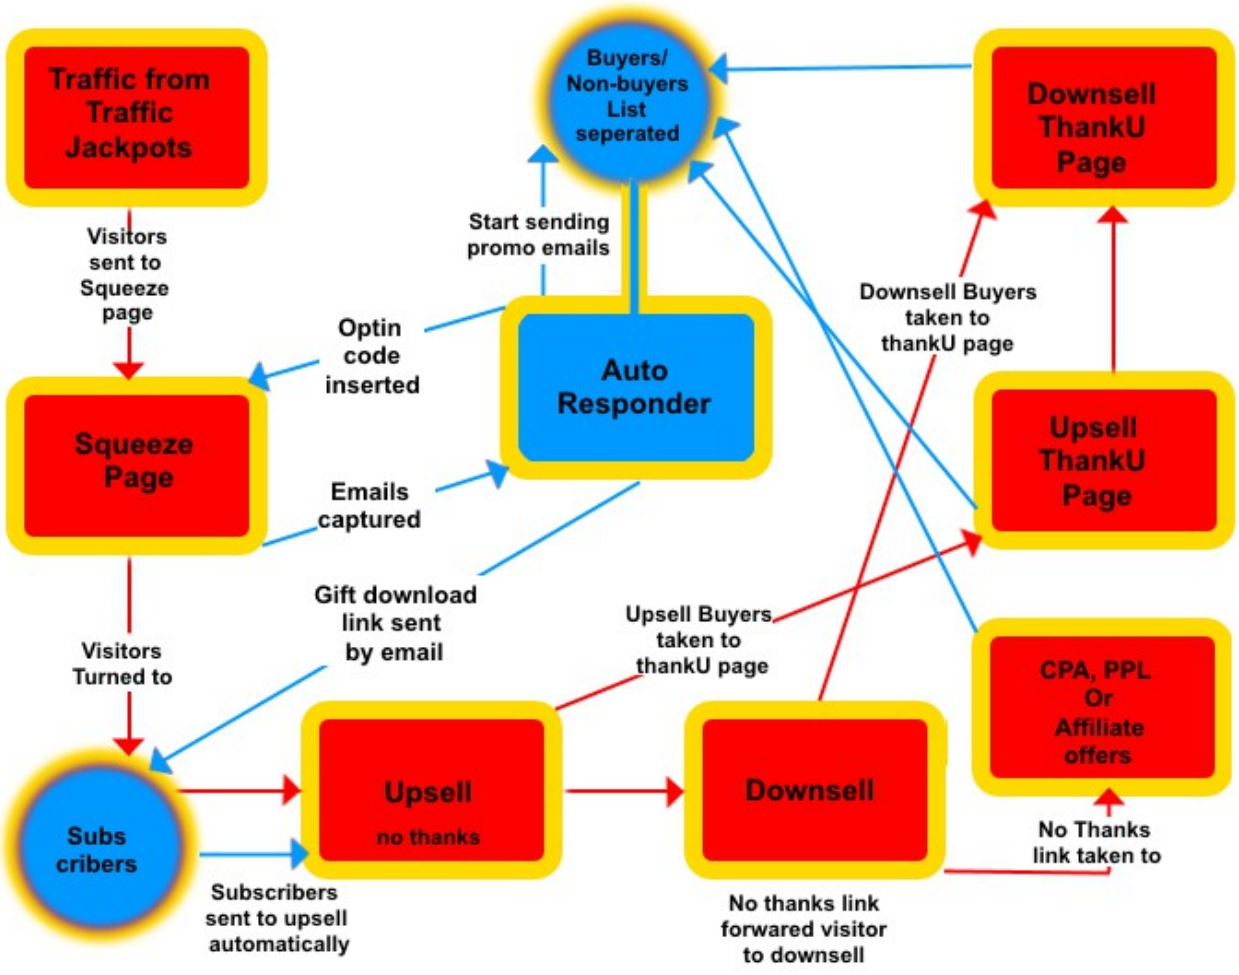

There are many good hosting companies out there. You can select any one of them. I have accounts with two companies, and I'm happy using both. One is **Hostgator** and another is **Bluehost**.

As for an auto-responder account, I want to recommend either **Aweber** or **Getresponse** because I am using both, and they have excellent service. But you are free to select your auto-responder company. There are many in the market.

We were talking about placing a funnel in front of your visitors generated from the traffic jackpots! So, what is meant by “funnel” in Internet marketing?

Funnels are a collection of transitional web pages, linked with each other in a special way. Funnels could be of many forms depending on how you want to place it. We recommend our funnel setup. We are using this simple funnel system for many years with great success. It's a combination of web pages and pre-written auto-responder emails like below:

Simple Funnel Flow Chart

You can add more products to sell simply by adding more Upsell and Downsell pages to the funnel.

This is the simplest funnel we use and to make a similar funnel you have to create the following:

1) A Squeeze Page

2) A Free Report to give away

3) A product that will sell (follow up of your free report)

4) Upsell page

5) Downsell page

6) Thank You pages

7) Pre-written Email sequence

8) Setting up all the 7 components in your hosting and auto-responder accounts in correct sequence.

There are many free and paid resources on the net, and you can make all the 7 components of your sales funnel with the help of those resources. But, if you don't want to make the funnel yourself, for some reason, you can check our **"Done For You" funnel here**. It comes with your own product, a 6 part video tutorial on list building. Of course you have to put your name on it before you sell the product at $17 (upsell) or $7 (downsell) from your funnel and get 100% in your paypal account!

Okay then. Time for the final words. I just want to say this, don't leave this report sitting on your hard drive gathering dust, go get stuck into the traffic jackpots and other tips and strategies in the report and make it work for You!
